**Heart of Darkness** Jul 22 2019 In a novella which remains highly controversial to this day, Conrad explores the relations between Africa and Europe. On the surface, this is a horrifying tale of colonial exploitation. The narrator, Marlowe journeys on business deep into the heart of Africa. But there he encounters Kurtz, an idealist apparently crazed and depraved by his power over the natives, and the meeting prompts Marlowe to reflect on the darkness at the heart of all men. This short but complex and often ambiguous story, which has been the basis of several films and plays, continues to provoke interpretation and discussion. Heart of Darkness grew out of a journey Joseph Conrad took up the Congo River; the verisimilitude that the great novelist thereby brought to his most famous tale everywhere enhances its dense and shattering power. Apparently a sailor's yarn, it is in fact a grim parody of the adventure story, in which the narrator, Marlow, travels deep into the heart of the Congo where he encounters the crazed idealist Kurtz and discovers that the relative values of the civilized and the primitive are not what they seem. Heart of Darkness is a model of economic storytelling, an indictment of the inner and outer turmoil caused by the European imperial misadventure, and a piercing account of the fragility of the human soul.

The Honest Drug Book (Deluxe Edition) Oct 25 2019 This is the full colour coffee table edition of *The Honest Drug Book*, with dimensions of 8.5" x 11" (21.59 x 27.94 cm). Produced to do justice to the hundreds of photographs, it also allows a more leisurely perusal of the contents. *The Honest Drug Book* presents the hidden truth about a topic which touches the lives of almost everyone. It cuts through the blustering rhetoric of the war on drugs, and documents the facts about the subject in general, and about the individual drugs specifically. This is a journey through 140 psychoactives, both chemical and botanical, each of which was personally tested and used by the author. For every drug, it lists the fundamental and sometimes life-critical information, including the anticipated onset, the common threshold doses, and the expected period of efficacy. It also describes the subjective experience: what the drug was actually like at each stage of the duration. These 'trip reports' are vital, as they help to identify pitfalls and specific risks for each substance. Often, this is achieved in a humorous and anecdotal manner, which is occasionally accentuated by the fact that the author had to travel the world to undertake the experiments lawfully. In addition to these often rich and lengthy reports, the book is crammed with data and general information, inclusive of legal briefings, relative harm tables, addiction and overdose advice, detailed reference material, and even a drug dictionary. Of critical importance is the first section, as it introduces the basics of harm reduction, in the form of a 10 step procedure to help mitigate risk. The same section explains core safety issues, such as how to test and identify a drug, and how to properly establish a dose. The book itself is lavishly illustrated with hundreds of photographs, including of the drugs themselves. The images in the botanical section also encompass some of the indigenous settings

encountered on the journey. The full gamut of psychoactive chemicals and botanicals is covered. The well known include: LSD, heroin, cannabis, mephedrone, kratom, cocaine, 2C-B, DMT, yopo, methamphetamine, salvia divinorum, ketamine, ayahuasca and MDMA. The lesser known include: betel nut, 4-ho-met, changa, TPA, 4F-MPH, ephenidine, ololiuqui, cebil seeds, mapacho, MNA, celastus paniculatus, yohimbe, and MEAI. The scope also extends beyond the most common categories of hallucinogens, stimulants, depressants, cannabinoids and opioids. Included, for example, are nootropics (smart drugs) and oneirogenics (lucid and vivid dream herbs). Another dimension, which is covered largely in the final section, is that of politics and the war on drugs. This is confronted head-on, with a statement of intent which is crystal clear: "People are dying because of ignorance. They are dying because unremitting propaganda is denying them essential safety information. They are dying because legislators and the media are censoring the science, and are ruthlessly pushing an ideological agenda instead. They are dying because the first casualty of war is truth, and the war on drugs is no different. This book is a step to counter this harrowing and destructive situation." Emphasised and underpinned throughout is personal safety and risk mitigation. This is the first and last message, and guides the entire narrative. This is a book that won't only fascinate and inform: it will save lives.
