Sprawl Repair Manual Mar 28 2022 There is a wealth of research and literature explaining suburban sprawl and the urgent need to retrofit suburbia. However, until now there has been no single guide that directly explains how to repair typical sprawl elements. The Sprawl Repair Manual demonstrates a step-by-step design process for the re-balancing and re-urbanization of suburbia into more sustainable, economical, energy- and resource-efficient patterns, from the region and the community to the block and the individual building. As Galina Tachieva asserts in this exceptionally useful book, sprawl repair will require a proactive and aggressive approach, focused on design, regulation and incentives. The Sprawl Repair Manual is a much-needed, single-volume reference for fixing sprawl, incorporating changes into the regulatory system, and implementing repairs through incentives and permitting strategies. This manual specifies the expertise that's needed and details the techniques and algorithms of sprawl repair within the context of reducing the financial and ecological footprint of urban growth. The Sprawl Repair Manual draws on more than two decades of practical experience in the field of repairing and building communities to analyze the current pattern of sprawl development, disassemble it into its elemental components, and present a process for transforming them into human-scale, sustainable elements. The techniques are illustrated both two- and three-dimensionally, providing users with clear methodologies for the sprawl repair interventions, some of which are radical, but all of which will produce positive results.

Ajs & Matchless 1957-1966 Workshop Manual All Models - Singles & Twins Feb 24 2022 186 pages, and more than 150 illustrations and charts, size 8.25 x 10.75 inches. This manual is a compilation of three original factory publications. The first is a reproduction of the 108 page 'Workshop Instruction Manual' for the 1957-64 Lightweight and Heavyweight singles and the twin cylinder models. The second is a reproduction of the 12 page 'Supplementary Instruction Book for Competition Models'. The third is a 60 page 'Instruction Book' combination that is exclusive to the 1958-1966 G2, G5, 14 and 8 Lightweight 250cc and 350cc singles. While the reprint of the original 108 page AMC workshop manual states that it is appropriate for the 1957-1964 models, it actually covers the entire line of AJS and Matchless 250cc to 650cc Lightweight and Heavyweight singles and 500cc to 650cc twins manufactured by AMC through 1966 (see below). Please note that it does not include the 750cc AMC G15/45 (1962-63) or the later Norton/AJS/ Matchless G15 hybrids. Owners of these 750cc hybrids are directed to the 'Norton 1966-70 Lightweight & Heavyweight Twins' workshop manual, ISBN 9781588502421 as it includes significant maintenance and repair information on those models. While the single cylinder machines are always considered the backbone of AMC's post-war production, in 1948 they introduced a 500cc twin cylinder, the AJS model 20 and Matchless G9. However, it was 1957 before that singular model was joined by a number of additional 500cc, 600cc and 650cc twins. In 1958 they also added two 'lightweight' singles to their well respected line of 'heavyweight' singles. Unfortunately, by the mid 1960's, along with most British motorcycle manufacturers, AMC was struggling to compete with the flood of Japanese imports and by 1966, the AMC conglomerate had collapsed. While the reason is mired in mergers, finances, consolidation, politics and worker unrest, both the AJS and Matchless name continued onward, under license, until early 1970, at which point both marques were history. 1957-1966 Lightweight and Heavyweight Singles and Twins covered in this manual are as follows: A.J.S. Models AJS 250cc Lightweight Singles: 14, 14CS, 14S, 14CSR AJS 350cc Lightweight Singles: 8 AJS 350cc Heavyweight

Singles: 16MS, 16, 16C, 16MC, 16MCS, 16S AJS 500cc Heavyweight Singles: 18S, 18, 18CS AJS 500cc Twins: 20, 20CS, 20CSR (Also covers the earlier AJS 20 from 1948 onwards) AJS 600cc Twins: 30, 30CS (Also covers the 1955/56 AJS 30) AJS 650cc Twins: 31, 31CS, 31CSR, 650 Twin Matchless Models Matchless 250cc Lightweight Singles: G2, G2CS, G2S, G2CSR Matchless 350cc Lightweight Singles: G5 Matchless 350cc Heavyweight Singles: G3LS, G3, G3C, G3LCS, G3S Matchless 500cc Heavyweight Singles: G80S, G80, G80CS Matchless 600cc Heavyweight Single: TCS. Matchless 500cc Twins: G9, G9CS, G9CSR (Also covers the earlier Matchless G9 from 1948 onwards) Matchless 600cc Twins: G11, G11CS (Also covers the 1955/56 Matchless G11) Matchless 650cc Twins: G12, G12CS, G12CSR, 650 Twin Owners of the AJS Heavyweight singles may also find the following two publications useful: ISBN 9781588501240 'Book of the 1945-60' models and ISBN 9781588501677 'Book of the 1955-65' models. Similarly, owners of the Matchless Heavyweight singles are referred to ISBN 9781588502087 'Book of the 1945-1956' models and ISBN 9781588502056 'Book of the 1955-66 models.

After the Trenches Dec 13 2020 At the end of the Great War, the U.S. Army faced the challenge of integrating what it had learned in the failures and ultimate success of its war effort. During the interwar years the army sought to balance readiness and modernization in a period of limited resources and technological advances with profound implications for the conduct of warfare. In *After the Trenches*, William O. Odom traces the development of combat doctrine between the world wars through an examination of the army's primary doctrine manuals, the Field Service Regulations. The Field Service Regulations of 1923 successfully assimilated the experiences of the First World War and translated them into viable tactical practice, Odom argues in this unique study. Rapidly developing technologies generated more efficient tools of war and greatly expanded the scale, tempo, and complexity of warfare. Personnel and material shortages led to a decline in the quality of army doctrine evidenced in the 1939 regulations. Examining the development of doctrine and the roles of key personalities such as John Pershing, Hugh Drum, George Lynch, Frank Parker, and Lesley McNair, Odom concludes that the successive revisions of the manual left the army scurrying to modernize its woefully outdated doctrine on the eve of the new war. This impressively researched study of the doctrine of the interwar army fills a significant gap in our understanding of the development of the U.S. Army during the first half of the twentieth century. It will serve scholars and others interested in military history as the standard reference on the subject. Moreover, many of the challenges and conditions that existed seventy years ago resemble those faced by today's army. This study of the army's historical responses to a declining military budget and an ever-changing technology will broaden the perspectives of those who must deal with these important contemporary issues.
