Banking and Beyond Dec 19 2021 This book explores the evolution of the banking sector and the financing tools it fosters, addressing the impact of new regulations and the ensuing opportunities for financial institutions, firms, and individuals. Written in two parts, the project includes papers presented at the 2019 Annual Conference of the Wolpertinger Club - The European Association of University Teachers in Banking and Finance. The first part addresses the impact of policy changes on banks and financial institutions, particularly the impact of recent changes in European policy. The authors explore how policy has been, and is, communicated and how it shapes new incentives and challenges for the banking sector and institutional and individual investors. The book touches upon the debate on the 'bail-in' vs 'bail-out' options and reviews new opportunities for investors on covered and subordinated bond markets in Europe, covering the new regulatory structure provided by the European authorities. The second part explores new financing tools besides the traditional banking sector available to firms and individuals, examining financing options for firms and individuals, and describing the role that alternative capital-market tools such as mini bonds and crowdfunding are playing within the landscape of SME financing. Arguing that financing decisions can ultimately affect the survival rate of startups, this edited collection will be valuable to those researching both finance and business, but particularly to those studying banking, financial institutions and entrepreneurial finance.

A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

Nature, Empire, and Nation Mar 10 2021 This collection of essays explores two traditions of interpreting and manipulating nature in the early-modern and nineteenth-century Iberian world: one instrumental and imperial, the other patriotic and national. Imperial representations laid the ground for the epistemological transformations of the so-called Scientific Revolutions. The patriotic narratives lie at the core of the first modern representations of the racialized body, Humboldtian theories of biodistribution, and views of the landscape as a historical text representing different

layers of historical memory.

Cecilia Valdés or El Angel Hill Feb 27 2020 Cecilia Valdés is arguably the most important novel of 19th century Cuba. Originally published in New York City in 1882, Cirilo Villaverde's novel has fascinated readers inside and outside Cuba since the late 19th century. In this new English translation, a vast landscape emerges of the moral, political, and sexual depravity caused by slavery and colonialism. Set in the Havana of the 1830s, the novel introduces us to Cecilia, a beautiful light-skinned mulatta, who is being pursued by the son of a Spanish slave trader, named Leonardo. Unbeknownst to the two, they are the children of the same father. Eventually Cecilia gives in to Leonardo's advances; she becomes pregnant and gives birth to a baby girl. When Leonardo, who gets bored with Cecilia after a while, agrees to marry a white upper class woman, Cecilia vows revenge. A mulatto friend and suitor of hers kills Leonardo, and Cecilia is thrown into prison as an accessory to the crime. For the contemporary reader Helen Lane's masterful translation of Cecilia Valdés opens a new window into the intricate problems of race relations in Cuba and the Caribbean. There are the elite social circles of European and New World Whites, the rich culture of the free people of color, the class to which Cecilia herself belonged, and then the slaves, divided among themselves between those who were born in Africa and those who were born in the New World, and those who worked on the sugar plantation and those who worked in the households of the rich people in Havana. Cecilia Valdés thus presents a vast portrait of sexual, social, and racial oppression, and the lived experience of Spanish colonialism in Cuba.

Process Flowsheeting Oct 17 2021 Process flowsheeting concerns the use of computers to stimulate and design chemical plant of all types, such as petroleum refineries, petrochemical complexes or even food factories. In this 1979 introduction to the topic the authors examine the role of flowsheeting in process plant design and look at the various techniques on which computer-aided systems may be based. For each one of these approaches the advantages and disadvantages are clearly stated and the four most important methods are described in detail. In each case the motivation for its development is analysed and its use is illustrated by a number of practical examples. Particular attention is devoted to the underlying technology of process flowsheeting systems, and an introduction to the analysis of degrees of freedom in flowsheeting and a guide to further reading are also included. This book will still hold value for those interested in the historical development of process flowsheeting.

The End of Work Apr 22 2022 The most significant domestic issue of the 2004 elections is unemployment. The United States has lost nearly three million jobs in the last ten years, and real employment hovers around 9.1 percent. Only one political analyst foresaw the dark side of the technological revolution and understood its implications for global employment: Jeremy Rifkin. The End of Work is Jeremy Rifkin's most influential and important book. Now nearly ten years old, it has been updated for a new, post-New Economy era. Statistics and figures have been revised to take new trends into account. Rifkin offers a tough, compelling critique of the flaws in the techniques the government uses to compile employment statistics. The End of Work is the book our candidates and our country need to understand the employment challenges-and the hopes-facing us in the century ahead.

The Blind Assassin Feb 18 2022 Winner of the Man Booker Prize By the author of The Handmaid's Tale and Alias Grace Laura Chase's older sister Iris, married at eighteen to a politically prominent industrialist but now poor and eighty-two, is living in Port Ticonderoga, a town dominated by their once-prosperous family before the First War. While coping with her unreliable body, Iris reflects on her far from exemplary life, in particular the events surrounding her sister's tragic death. Chief among these was the publication of The Blind Assassin, a novel which earned the dead Laura Chase not only notoriety but also a devoted cult following. Sexually explicit for its time, The Blind Assassin describes a risky affair in the turbulent thirties between a wealthy young woman and a man on the run. During their secret meetings in rented rooms, the lovers concoct a pulp fantasy set on Planet Zycron. As the invented story twists through love and sacrifice and betrayal, so does the real one; while events in both move closer to war and catastrophe. By turns lyrical, outrageous, formidable, compelling and funny, this is a novel filled with deep humour and dark drama.

The Harlot By The Side Of The Road Nov 25 2019 The Harlot by the Side of the Road is the first book to shed light on strange biblical passages which have largely been ignored by ministers, priests and rabbies because they seemed too awkward to examine. Johnathan Kirsch retells these 'forbidden' stories in contemporary English, alongside the original text, and demonstrates that the people in biblical times were as vulnerable, confused and prone to weakness of the flesh and failure of the spirit as any character in Homer, Shakespeare or Dostoevsky, and wrestled with the same problems of the heart and mind that still confront us today. He also explains how each story found its way into the Bible, why it was originally suppressed and examines the rituals, customs and politics that bring these extraordinary tales alive for the contemporary reader.

Manual de Aire Acondicionado y Ventilación Industrial 1 Sep 27 2022 El Manual de Aire Acondicionado, en sus 4 tomos pretende orientar el conocimiento de la aplicación y uso del Aire Acondicionado para las instalaciones térmicas de verano e invierno. Los conceptos físicos elementales se consideran ya adquiridos en la formación técnica del lector. En cuanto a la descripción de los componentes y equipos, se describen conceptualmente, profundizando en aquellos de mayor uso. La información contenida es de suma actualidad, y el análisis de carga térmica de verano está aplicado en relación a las últimas normas y datos de cálculo modificadas por I.R.A.M. en 2007 y según Normas ASHRAE. La experiencia profesional y pedagógica me ha permitido realizar por primera vez un desarrollo de cálculo de la carga térmica verano-invierno para la Argentina. Hasta ahora los sistemas de cálculo a disposición de los técnicos y profesionales contemplaban la aplicación de datos climáticos y de radiación solar para el hemisferio Norte y trasladados al hemisferio Sur por similitud. En el presente trabajo se han tomado los valores reales de temperatura y radiación de 118 estaciones meteorológicas de la Argentina y 30 estaciones de otros países. Se ha consultado toda la bibliografía disponible, y las últimas novedades técnicas introducidas en instalaciones térmicas. Como será del conocimiento del lector, de todos los componentes de la obra arquitectónica, (estructuras, fundaciones, cerramientos, carpinterías, solados, revestimientos, etc.), las instalaciones en general constituyen el rubro donde en los últimos años, se han incorporado mayores innovaciones tecnológicas, desde el perfeccionamiento en la fabricación sistemática y robotizada, hasta el uso de ordenadores para el cálculo y secuencia controlada de funcionamiento.
