**Unions in America** Aug 23 2021 *Unions in America* provides a concise and current introduction to what America's labor unions do and why they do it. In this engaging text, author Gary Chaison portrays America's unions as complex, self-governing organizations that are struggling to regain their lost membership, bargaining power, and political influence. This accessible textbook offers an impartial overview of American unions that ranges from the struggle for recognition from employers in their earliest years to their present-day difficulties.

**Rekindling the Movement** Nov 01 2019 From gloomy times in the 1980s, the American labor movement has returned to apparent prominence through the efforts of a new generation of energetic and progressive leaders. A distinguished group of authors examines this resurgence and the potential of American unions with sympathetic yet critical eyes. Experts from a wide variety of disciplines—industrial relations, political science, economics, and sociology—identify the central developments, analyze the strengths and weaknesses of the new initiatives, and assess the progress made and the prospects for the future. Though all agree on the importance of unions, their opinions of the success of current renewal efforts diverge greatly. The interdisciplinary and comparative approach of *Rekindling the Movement* is both challenging and enlightening. Rather than merely trumpeting pet opinions, contributors provide hard evidence and causal analysis, grounded in realistic perspectives, to back up suggestions for the improvement of the new labor movement. Their straightforward observations about what is and is not possible, what does and does not work, will be of great practical value for policymakers and union leaders.

**The Transformation of U.S. Unions** Jan 16 2021 Primarily investigates how important the 1995 change in the leadership of the AFL-CIO, the US federation of labor unions, may turn out to be for the course of the labor movement. The Baltimore Book Oct 25 2021 Baltimore has a long, colorful history that traditionally has been focused on famous men, social elites, and patriotic events. The Baltimore Book is both a history of "the other Baltimore" and a tour guide to places in the city that are important to labor, African American, and women's history. The book grew out of a popular local bus tour conducted by public historians, the People's History Tour of Baltimore, that began in 1982. This book records and adds sites to that tour; provides maps, photographs, and contemporary documents; and includes interviews with some of the uncelebrated people whose experiences as Baltimoreans reflect more about the city than Francis Scott Key ever did. The tour begins at the B&O Railroad Station at Camden Yards, site of the railroad strike of 1877, moves on to Hampden-Woodbury, the mid-19th century cotton textile industry's company town, and stops on the way to visit Evergreen House and to hear the narratives of ex-slaves. We travel to Old West Baltimore, the late 19th-century center of commerce and culture for the African American community; Fells Point; Sparrows Point; the suburbs; Federal Hill; and Baltimore's "renaissance" at Harborplace. Interviews with community activists, civil rights workers, Catholic Workers, and labor union organizers bring color and passion to this historical tour. Specific labor struggles, class and race relations, and the contributions of women to Baltimore's development are emphasized at each stop. Author note: Elizabeth Fee is Professor in the Department of Health Policy and Management of The Johns Hopkins University School of Hygiene and Public Health. Linda Shopes is Associate Historian at the Pennsylvania Historical and Museum Commission. Linda Zeidman is Professor of History and Economics at Essex Community College.

**From Meteorite Impact to Constellation City** Sep 04 2022 From Meteorite Impact to Constellation City is a historical geography of the City of Greater Sudbury. The story that began billions of years ago encompasses dramatic physical and human events. Among them are volcanic eruptions, two meteorite impacts, the ebb and flow of continental glaciers, Aboriginal occupancy, exploration and mapping by Europeans, exploitation by fur traders and Canadian lumbermen and American entrepreneurs, the rise of global mining giants, unionism, pollution and re-greening, and the creation of a unique constellation city of 160,000. The title posits the book's two main themes, one physical in nature and the other human: the great meteorite impact of some 1.85 billion years ago and the development of Sudbury from its inception in 1883. Unlike other large centres in Canada that exhibit a metropolitan form of development with a core and surrounding suburbs, Sudbury developed in a pattern resembling a cluster of stars of differing sizes. Many of Sudbury's most characteristic attributes are undergoing transformation. Its rocky terrain and the negative impact from mining companies are giving way to attractive neighbourhoods and the planting of millions of trees. Greater Sudbury's blue-collar image as a union powerhouse in a one-industry town is also changing; recent advances in the fields of health, education, retailing, and the local and international mining supply and services sector have greatly diversified its employment base. This book shows how Sudbury evolved from a village to become the regional centre for northeastern Ontario and a global model for economic diversification and environmental rehabilitation.

*The Next Upsurge* Apr 06 2020 The U.S. labor movement may be on the verge of massive growth, according to Dan Clawson. He argues that unions don't grow slowly and incrementally, but rather in bursts. Even if the AFL-CIO could organize twice as many members per year as it now does, it would take thirty years to return to the levels of union membership that existed when Ronald Reagan was elected president. In contrast, labor membership more than quadrupled in the years from 1934 to 1945. For there to be a new upsurge, Clawson asserts, labor must fuse with social movements concerned with race, gender, and global justice. The new forms may create a labor movement that breaks down the boundaries between "union" and "community" or between work and family issues. Clawson finds that this is already happening in some parts of the labor movement: labor has endorsed global justice and opposed war in Iraq, student activists combat sweatshops, unions struggle for immigrant rights. Innovative campaigns of this sort, Clawson shows, create new strategies—determined by workers rather than union organizers—that redefine the very meaning of the labor movement. The Next Upsurge presents a range of examples from attempts to replace "macho" unions with more feminist models to campaigns linking labor and community issues and attempts to establish cross-border solidarity and a living wage.

Three Strikes Jul 22 2021 This eloquently written book chronicles the massive, protracted strikes waged against three large corporations in Decatur, Illinois, in the 1990s. Veteran journalist Stephen Franklin shows how labor disputes at Bridgestone/Firestone, Caterpillar, and A. E. Staley left lasting scars on this town and its citizens—and marked a turning point in American labor history. When workers went on strike to retain such basic rights as job security and the 8-hour day, the corporations hit

back with unprecedented hard-line tactics. Through the moving stories of individual workers and union activists, Franklin illuminates the hardships and disillusionment left in the wake of the strikes, and the powerful forces that caught an unprepared labor leadership off guard. He vividly portrays how the balance of labor-management power was shifted by corporate globalization, cutthroat labor practices, the outdated responses of national unions and government regulators, and an apathetic public. Reflecting on the hard-won lessons of Decatur, the book describes how the quality of work and life are now threatened—not just for blue-collar workers, but for all Americans—and what it will take to safeguard them.

**Working Stiffs, Union Maids, Reds, and Riffraff** Jun 08 2020 The revised and expanded edition of *Working Stiffs, Union Maids, Reds, and Riffraff* offers 350 titles compared to the original edition's 150. The new book is global in scope, with examples of labor films from around the world. Viewers can turn to this comprehensive, annotated guide for films about unions or labor organizations; labor history; working-class life where an economic factor is significant; political movements if they are tied closely to organized labor; production or the struggle between labor and capital from a "top-down"—either entrepreneurial or managerial—perspective. Each entry includes a critical commentary, production data, cast list, MPAA rating (if any), suggested related films, annotated references to books and websites for further reading, and information about availability of films for rental and/or purchase. This edition addresses both historical and contemporary films and features many more documentaries and hard-to-find information about agitprop and union-financed films. *Working Stiffs, Union Maids, Reds, and Riffraff: An Expanded Guide to Films about Labor* features fifty-eight production stills and frame enlargements. It also includes a greatly expanded Thematic Index of Films. Two new sections will help the reader discover labor films in chronological order or by nationality or affiliation with certain cinematic movements. To read Tom Zaniello's blog on the cinema of labor and globalization, featuring even more reviews, visit <http://tzaniello.wordpress.com>. Praise for the earlier edition: "Zaniello has created a useful and far-reaching guide with abundant information.... These are the sorts of films that prove what James Agee wrote in these pages nearly fifty years ago: 'The only movies whose temper could possibly be described as heroic, or tragic, or both, have been made by leftists.'"—*The Nation* "Zaniello has done a monumental job identifying the films that should be included in this genre.... *Working Stiffs, Union Maids, Reds, and Riffraff* is sorely needed and long overdue."—*Cineaste* "An engaging and opinionated book.... Even though mining, trucking, Jimmy Hoffa, and class warfare are the book's major themes, what holds the project together is Zaniello's sense of fun and wit. [Zaniello is] a better writer than most major film critics."—*Village Voice Literary Supplement*

*Voices from French Ontario* Mar 30 2022 For more than a year and a half Sheila Arnopoulos travelled through the region visiting or living in Sudbury, Hearst, Dubreuilville, and Timmins. Here she chronicles the changes time has brought to the lives of some of the 700,000 people of French origin in Ontario. She describes the blossoming of a culture which draws from both French and English backgrounds. She features the stories of two celebrated Canadian businessmen from Sudbury, Paul Desmarais and Robert Campeau, in a discussion of the development of a new commercial and financial élite. Arnopoulos also writes of miners, poets, playwrights, lumber barons, and ordinary people, to give a vivid picture of their frustrations and aspirations. The French of Nouvel-Ontario have created a regional identity of their own. But under what conditions can French communities in English Canada hope to survive? Arnopoulos finds that federal bilingualism and the expansion of French Quebec businesses across the country are most likely the key factors.

**Global Unions, Local Power** Jan 28 2022 News about labor unions is usually pessimistic, focusing on declining membership and failed campaigns. But there are encouraging signs that the labor movement is evolving its strategies to benefit workers in rapidly changing global economic conditions. *Global Unions, Local Power* tells the story of the most successful and aggressive campaign ever waged by workers across national borders. It begins in the United States in 2007 as SEIU struggled to organize private security guards at G4S, a global security services company that is the second largest employer in the world. Failing in its bid, SEIU changed course and sought allies in other countries in which G4S operated. Its efforts resulted in wage gains,

benefits increases, new union formations, and an end to management reprisals in many countries throughout the Global South, though close attention is focused on developments in South Africa and India. In this book, Jamie K. McCallum looks beyond these achievements to probe the meaning of some of the less visible aspects of the campaign. Based on more than two years of fieldwork in nine countries and historical research into labor movement trends since the late 1960s, McCallum's findings reveal several paradoxes. Although global unionism is typically concerned with creating parity and universal standards across borders, local context can both undermine and empower the intentions of global actors, creating varied and uneven results. At the same time, despite being generally regarded as weaker than their European counterparts, U.S. unions are in the process of remaking the global labor movement in their own image. McCallum suggests that changes in political economy have encouraged unions to develop new ways to organize workers. He calls these "governance struggles," strategies that seek not to win worker rights but to make new rules of engagement with capital in order to establish a different terrain on which to organize.

**American Workers, American Unions** Jul 10 2020 Highly acclaimed and widely read, *American Workers, American Unions* (first published in 1986, revised ed. 1994) provides a concise and compelling history of American workers and their unions in twentieth-century America. This new edition features new chapters on the pre-1920 period, as well as an entirely new final chapter that covers developments of the 1980s and 1990s in detail. There the authors explore how economic change, union stagnation, and antilabor policies have combined to erode workers' standards and labor's influence in the political arena over the last two decades. They review current "alternatives to unionism" as means of achieving fair workplace representations but insist that strong unions remain essential in a democratic society. They argue that labor's new responsiveness to the concerns of women, minority groups, and low-wage workers, as well as its resurgent political activism, offer new hope for trade unionism. Also included in this third edition is new bibliographical material and a regularly updated on-line link to an extended bibliographical essay.

**Sociology of Work** Dec 03 2019 The simple act of going to work every day is an integral part of all societies across the globe. It is an ingrained social contract: we all work to survive. But it goes beyond physical survival. Psychologists have equated losing a job with the trauma of divorce or a family death, and enormous issues arise, from financial panic to sinking self-esteem. Through work, we build our self-identity, our lifestyle, and our aspirations. How did it come about that work dominates so many parts of our lives and our psyche? This multi-disciplinary encyclopedia covers curricular subjects that seek to address that question, ranging from business and management to anthropology, sociology, social history, psychology, politics, economics, and health. Features & Benefits: International and comparative coverage. 335 signed entries, A-to-Z, fill 2 volumes in print and electronic formats. Cross-References and Suggestions for Further Readings guide readers to additional resources. A Chronology provides students with historical perspective of the sociology of work. In the electronic version, the comprehensive Index combines with the Cross-References and thematic Reader's Guide themes to provide robust search-and-browse capabilities.

*Ravenswood* Nov 06 2022 Since the late 1970s, Americans have seen their workplaces downsized and streamlined, their jobs out-sourced and often eliminated while their unions have seemed powerless to defend them. This text recounts how the United Steelworkers of America proved that organized labour can still win.

**Collision Course** Jun 28 2019 In August 1981, the Professional Air Traffic Controllers Organization (PATCO) called an illegal strike. The new president, Ronald Reagan, fired the strikers, establishing a reputation for both decisiveness and hostility to organized labor. As Joseph A. McCartin writes, the strike was the culmination of two decades of escalating conflict between controllers and the government that stemmed from the high-pressure nature of the job and the controllers' inability to negotiate with their employer over vital issues. PATCO's fall not only ushered in a long period of labor decline; it also served as a harbinger of the campaign against public sector unions that now roils American politics. Now available in paperback, *Collision Course* sets the strike within a vivid panorama of the rise of the world's busiest air-traffic control system. It begins with an arresting account of the 1960 midair collision over New York that cost 134 lives and exposed the weaknesses of an overburdened system. Through the stories of controllers like Mike Rock and Jack Maher, who were galvanized into action by that disaster and went on to found PATCO, it describes the efforts of those who sought to make the airways safer and fought to win a secure place in the American middle class. It climaxes with the story of Reagan and the controllers, who surprisingly endorsed the Republican on the promise that he would address their grievances. That brief, fateful alliance triggered devastating miscalculations that changed America, forging patterns that still govern the nation's labor politics. Written with an eye for detail and a grasp of the vast consequences of the PATCO conflict for both air travel and America's working class, *Collision Course* is a stunning achievement.

Labor in the Age of Finance Apr 18 2021 From award-winning economic historian Sanford M. Jacoby, a fascinating and important study of the labor movement and shareholder capitalism Since the 1970s, American unions have shrunk dramatically, as has their economic clout. *Labor in the Age of Finance* traces the search for new sources of power, showing how unions turned financialization to their advantage. Sanford Jacoby catalogs the array of allies and finance-based tactics labor deployed to stanch membership losses in the private sector. By leveraging pension capital, unions restructured corporate governance around issues like executive pay and accountability. In Congress, they drew on their political influence to press for corporate reforms in the wake of business scandals and the financial crisis. The effort restrained imperial CEOs but could not bridge the divide between workers and owners. Wages lagged behind investor returns, feeding the inequality identified by Occupy Wall Street. And labor's slide continued. A compelling blend of history, economics, and politics, *Labor in the Age of Finance* explores the paradox of capital bestowing power to labor in the tumultuous era of Enron, Lehman Brothers, and Dodd-Frank.

*The Future of Organised Labour* Dec 15 2020 "This book offers analysis of the causes and extent of the movement's current malaise from a variety of vantage points. It provides eight national and regional studies - China, Britain, France, the US, Eastern Europe, Brazil, Ghana and Cameroon - that detail problems face and the revitalisation strategies trade unions have pursued in response. It also offers fresh scholarly perspective on a host of pressing labour issues: the extent and impact of global corporate restructuring; the ongoing fight to achieve core labour standards; the enduring importance of gender and diversity; the fortunes of the international labour movement; the relationship between trade unions and NGOs; the intellectual response to organised labour's present predicament; and the role of labour in the global social justice movement." -- BACK COVER.

**Global Unions** May 20 2021 To meet the challenges of globalization, unions must improve their understanding of the changing nature of corporate ownership structures and practices, and they must develop alliances and strategies appropriate to the new environment. *Global Unions* includes original research from scholars around the world on the range of innovative strategies that unions use to adapt to different circumstances, industries, countries, and corporations in taking on the challenge of mounting cross-border campaigns against global firms. This collection emerges from a landmark conference where unionists, academics, and representatives of nongovernmental organizations from the Global South and the Global North met to devise strategies for labor to use when confronting the most powerful corporations such as Wal-Mart and Exxon Mobil. The workplaces discussed here include agriculture (bananas), maritime labor (dock workers), manufacturing (apparel, automobiles, medical supplies), food processing, and services (school bus drivers). Kate Bronfenbrenner's introduction sets the stage, followed by contributions describing specific examples from Asia, Latin America, and Europe. Bronfenbrenner's conclusion focuses on the key lessons for strengthening union power in relation to global capital.

Workers' Rights as Human Rights May 08 2020 Until recently, the international human rights movement and nongovernmental organizations, human rights scholars, and even labor organizations and advocates have given little attention to worker rights as human rights. James A. Gross finds, however, that employers, not just governments, have the power to violate workers' rights. *Workers' Rights as Human Rights* provides a new perspective on the assessment of U.S. labor relations law by

using human rights principles as standards for judgment. The authors also present innovative recommendations for what should and can be done to bring U.S. labor law into conformity with international human rights standards. This volume constitutes a long overdue beginning toward the promotion and protection of worker rights as human rights in the United States.

*Global Unions* Aug 03 2022 'Global Unions' features research from scholars around the world on the range of innovative strategies that unions use to adapt to different circumstances, industries, countries, and corporations in taking on the challenge of mounting cross-border campaigns against global firms.

Wives of Steel Mar 18 2021 *Wives of Steel* is based on more than eighty formal interviews conducted over a fifteen-year period with women and some men, both white and black, all of whom were part of Sparrows Point as workers, spouses, or longtime residents of the local communities. We also see the distinct differences and surprising similarities among the lives of black and white women, which often reflect the complicated relationships among black and white steelworkers in the plant.

**The Future of Work in Massachusetts** Jun 01 2022 Across Massachusetts, workers in virtually all sectors of the economy are facing reorganization, new technology, and the intensification of expectations and demands. With globalization, smaller employers are increasingly becoming part of large multinational companies, and workers are now forced to compete on a world stage. The result is that long-term, stable jobs are disappearing as work has become more temporary, part-time, and contingent. This volume offers a collection of original essays that explore the changing nature of work in the Commonwealth and its impact on workers, their families, and their communities. Taking a multidisciplinary approach, the contributors examine the impact of offshoring and outsourcing and the growth of low-wage employment in the service sector, while also looking at the software industry and the future of high-tech jobs. The volume includes an overview of the economics of work in Massachusetts, an analysis of the experience of women and minorities in the workforce, and a case study of the fiscal crisis in Springfield and its relationship to employment issues. Several chapters address the challenges and prospects in the health care industry. Finally, a number of authors examine the complex ways in which these adjustments in the nature of work play out in families across the state, and how policy changes could help workers and their families adjust to these new environments. In addition to Tom Juravich, contributors include Randy Albelda, Mark Brenner, Kate Bronfenbrenner, Heather Bourne, Alan Clayton-Matthews, Dan Clawson, Xiaogang Deng, Robert Farrant, Naomi Gerstel, Dana Huyser, Marlene Kim, Sarah Kuhn, William Lazonick, Stephanie Luce, Karen Meteyer, Maureen Perry-Jenkins, Steven Quimby, Paulala Rayman, Randall P.
