*Knowledge Management Case Book* Jul 08 2020 This book provides a perspective on knowledge management at Siemens - an internationally recognised benchmark - by presenting the reader with the best of the corporation's practical applications and experiences. Tom Davenport and Gilbert Probst bring together instructive case studies from different areas that reflect the rich insights gained from years of experience in

practising knowledge management. Most of the cases have been updated for the second edition. New cases have been added. The Knowledge Management Case Book provides a comprehensive account of how organisational knowledge assets can be managed effectively. Specific emphasis is given to the development of generic lessons that can be learned from Siemens' experience. The book also offers a roadmap to building a "mature knowledge enterprise", thereby enhancing our understanding of the steps that need to be taken in order to sustain competitive dominance in the knowledge economy. Presenting applications from very different areas, this practice-orientated book is really outstanding in the broad field of KM literature.

"Perhaps the most revealing - and interesting - part of the cases in this book is not the analysis of the various knowledge management tools and processes, but the description of their development, of how they come about, of how commitment was gained, of how implementation was led." Yves Doz, The Timken Chair Professor of Global Technology and Innovation at INSEAD, Fontainebleau "This case book brings insights how our most valuable resource makes those tools happen. I found this book exciting reading, because it is, to my knowledge, the only book where a single company with a wide variety of knowledge management approaches accumulates years of experiences and lessons learned. Edited by two of the leading thinkers in the field of knowledge management, this book will show the way you practise knowledge management in your company." Heinz Fischer, Global Head of HR, Deutsche Bank AG "This book is a rare and valuable description of a single company's knowledge management journey. Siemens has made impressive advances in becoming a knowledge-driven firm, and this volume details many of its directions and waystations." Laurence Prusak, Executive Director, IBM Institute for Knowledge Management "Though there are many books on Knowledge Management, this is a unique one on a sense that it provides practical application of KM rather than the jargon." Sushil, Modi Foundation Chair Professor and Group Chair, Department of Management Studies, Indian Institute of Technology, New Delhi

*The General Part of Criminal Law Aug 01 2022* The second volume of this study on criminal law sets out the substance and practicalities of criminal law for which the theory has been provided in the first volume; for example, specific matters such as defences and inchoate crimes. The subject of defences is organised into four chapters. The first considers general exemptions such as in cases of insanity and automatism. The second chapter covers partial defences, such as in cases of provocation or intoxication; and the third, complete defences as in a case of the preservation of public order, or prevention of, or defence against crime. A chapter on complete defence considers consent, revocation of consent, and ignorance or mistake of facts. *Constitutional Law in Context Apr 28 2022* *Constitutional Law in Context* (two volumes) puts major constitutional developments into historical perspective by helping students see how doctrinal developments were shaped by historical context and how historical developments affecting one doctrine often influenced other doctrines as well. Obvious examples include changes in commerce clause doctrine, substantive due process, and law related to race and gender. The chapter on incorporation shows how the framers of the amendment were influenced by denials of civil liberties that occurred during the crusade against slavery. The books illustrate the development of constitutional law over time so that changes in the law can be related to changes in society. It reminds students that related changes often occur across a range of doctrinal areas; for example, parallel changes occur in both commerce clause and substantive due process doctrine as a result of changes during the New Deal. Decisions relevant to race discrimination involve not only equal protection, but also the reading of the commerce clause as illustrated by the Supreme Court's *Heart of Atlanta* decision. The two volumes also contain materials on constitutional decision-making outside of the Supreme Court. These include materials on the Clinton impeachment, examples from free speech history, and state cases interpreting state constitutions. Finally, it is designed to assist students in understanding and formulating constitutional arguments. Authors Curtis, Parker, Douglas, and Finkelman identify and discuss forms of constitutional argument, such as arguments based on text, history, or structure and provide charts and diagrams to assist students in identifying the logical structure of constitutional analysis.

revisions of the non-Hodgkin lymphoma and leukaemia sections, based on the WHO Classification of Hematopoietic and Lymphoid Diseases. The five-digit morphology codes allow identification of a tumour or cell type by histology, behaviour, and grade. Revisions in the morphology section were made in consultation with a large number of experts and were finalised after field-testing in cancer registries around the world.
