Integrating Technology in Positive Psychology Practice Jul 30 2019 Most research on the psychological impact of computers and the Internet has focused on the negative side of technology – i.e. how the use (abuse) of interactive systems and videogames can negatively affect mental health and behavior. On the other hand, less attention has been devoted to understanding how emerging technologies can promote optimal functioning at individual, group, and community levels. Integrating Technology in Positive Psychology Practice explores the various roles that technology can play in the development of psychological interventions aimed at helping people thrive. Exploring the ways in which ICT can be utilized to foster positive emotions, promote engagement in empowering activities, and support connectedness between individuals, groups, and communities, this timely publication is designed for use by psychologists, IT developers, researchers, and graduate students.

On the Track of the Books Aug 11 2020 This book offers the hint for a new reflection on ancient textual transmission and editorial practices in Antiquity. In the first section, it retraces the first steps of the process of ancient writing and editing. The reader will discover how the book is both a material object and a metaphorical personification, material or immaterial. The second section will focus on corpora of Greek texts, their formation, and their paratextual apparatus. Readers will explore various issues dealing with the mechanisms that are at the basis of the assembling of ancient Greek texts, but great attention will also be given to the role of ancient scholarly work. The third section shows how texts have two levels of authorship: the author of the text, and the scribe who copies the text. The scribe is not a medium, but plays a crucial role in changing the text. This section will focus on the protagonists of some interesting cases of textual transmission, but also on the books they manufactured or kept in the libraries, and on the words they engraved on stones. Therefore, the fresh voices of the contributors of this book, offer new perspectives on established research fields dealing with textual criticism.

Dante's Lyric Redemption Jul 22 2021 Dante's Lyric Redemption offers a re-examination of two strongly interrelated aspects of the poet's work: the role and value he ascribes to earthly love and his relationship to the Romance lyric tradition of his time. It argues that an account of Dante's poetic journey that posits a stark division between earthly and divine love, and between the secular lyric poet and the Christian auctor, does little justice to his highly distinctive and often polemical handling of these categories. The book firstly contextualizes, traces, and accounts for Dante's intriguing commitment to love poetry, from the 'minor works' to the Commedia. It highlights his attempts, especially in his masterpiece, to overcome normative oppositions in formulating a uniquely redemptive vernacular poetics, one oriented towards the eternal while rooted in his affective, and indeed erotic, past. It then examines how this matter is at stake in Dante's treatment of three important lyric predecessors: Guittone d'Arezzo, Arnaut Daniel, and Folco de Marselles. Through a detailed reading of Dante's engagement with these poets, the book illuminates his careful departure from a dualistic model of love and conversion and shows his erotic commitment to be at the heart of his claims to pre-eminence as a vernacular author.

La Scherma Nov 25 2021 "This is the first published English translation of Francesco Alfieri's fencing treatise: "La Scherma", first published in Padua in 1640. Alfieri was the Master at Arms at the Accademia Delia in Padua, Italy from 1632. The Delia was a school attached to the University of Padua teaching young gentlemen military skills, mathematics and the martial arts of self defence. It is not widely appreciated that Europe has martial arts traditions that are centuries old. Contained within this book is a description of one of these European combat systems – the art of fighting with the Rapier – a long, slender, civilian sword designed for self defence and duelling. The ability to wield such a weapon with skill was a matter of vital importance in an age when the defence of honour and, by definition, the immortal soul, could be more important than life itself. Alfieri's concise system is a very practical and effective way to address this need. It is an excellent resource for all students of historical swordplay and anyone interested in the martial arts of Renaissance Europe." -- Amazon.com
