**Time Present and Time Past** Oct 26 2019

Fintan Buckley is a pleasant, rather conventional and unimaginative man, who works as a legal adviser in an import/export firm in Dublin. He lives in Howth and is married to Colette. They have two sons who are at university, and a small daughter. As he goes about his life, working and spending time with his family, Fintan begins to experience states of altered consciousness and auditory hallucinations, which seem to take him out of a linear experience of time. He becomes interested in how we remember or imagine the past, an interest triggered by becoming aware of early photography, particularly early colour photography. He also finds himself thinking more about his own past, including time spent holidaying in the north of Ireland as a child with his father's family. Over the years he has become distanced from them, and in the course of the novel this link is re-established and helps to bring him understanding and peace, although in a most unexpected way. Time Present and Time Past, Deirdre Madden's eighth novel for adults, is about time: about how not just daily life and one's own, or one's family's past, intersect with each other.

**Secret Language of Animals** Mar 24 2022

Unlock the secrets behind the behavior of the world's most fascinating creatures? from the Adélie penguin to the plains zebra to the giant panda?in this wonderfully written, beautifully illustrated book. In *The Secret Language of Animals*, biologist Janine Benyus takes us inside the animal kingdom and shows us the whys and the hows behind the distinctive behavior of creatures great and small in their natural environments. Divided geographically into five sections?Africa, Asia, North America, the oceans, and the poles?the book examines and describes the behavior, body language, and patterns of communication of 20 different animals: the gorilla, lion, African elephant,

plains zebra, black rhinoceros, giraffe, ostrich, greater flamingo, Nile crocodile, giant panda, peacock, Komodo monitor, bottlenose dolphin, California sea lion, gray wolf, bald eagle, sandhill crane, beluga whale, polar bear, and Adélie penguin. For each animal, Benyus describes and explains basic behaviors (locomotion, feeding, drinking, bathing, grooming, sleeping), communication behavior (greeting, social play, group defense, conflict, aggression/submission, fighting, courtship, copulation), and parenting behavior (birth, care and feeding, teaching, communal care). The book is illustrated throughout with tender yet precise line drawings that beckon us to the animals and vividly capture everything from changing facial expressions to nurturing postures to playful and aggressive interactions. The text, too, is both intimate and informative, allowing for a deep connection with, and a great admiration for, each one of the animals.

*Enhancing Food Safety* Oct 19 2021 Recent outbreaks of illnesses traced to contaminated sprouts and lettuce illustrate the holes that exist in the system for monitoring problems and preventing foodborne diseases. Although it is not solely responsible for ensuring the safety of the nation's food supply, the U.S. Food and Drug Administration (FDA) oversees monitoring and intervention for 80 percent of the food supply. The U.S. Food and Drug Administration's abilities to discover potential threats to food safety and prevent outbreaks of foodborne illness are hampered by impediments to efficient use of its limited resources and a piecemeal approach to gathering and using information on risks. *Enhancing Food Safety: The Role of the Food and Drug Administration*, a new book from the Institute of Medicine and the National Research Council, responds to a congressional request for recommendations on how to close gaps in FDA's food safety systems. *Enhancing Food Safety* begins with a brief review of the Food Protection Plan (FPP), FDA's food safety philosophy developed in 2007. The lack of sufficient detail and specific strategies in the FPP renders it ineffectual. The book stresses the need for FPP to evolve and be supported by the type of strategic planning described in these pages. It also explores the development and implementation of a stronger, more effective

food safety system built on a risk-based approach to food safety management. Conclusions and recommendations include adopting a risk-based decision-making approach to food safety; creating a data surveillance and research infrastructure; integrating federal, state, and local government food safety programs; enhancing efficiency of inspections; and more. Although food safety is the responsibility of everyone, from producers to consumers, the FDA and other regulatory agencies have an essential role. In many instances, the FDA must carry out this responsibility against a backdrop of multiple stakeholder interests, inadequate resources, and competing priorities. Of interest to the food production industry, consumer advocacy groups, health care professionals, and others, *Enhancing Food Safety* provides the FDA and Congress with a course of action that will enable the agency to become more efficient and effective in carrying out its food safety mission in a rapidly changing world.

*Timegods' World* Jul 24 2019 This omnibus contains two novels by L.E. Modesitt that comprise a larger story unit, *Timedivers Dawn* and *The Timegod* (expanded from his first novel, *The Fires of Paratime*). They were formerly published in mass market original form and are now combined and published together for the first time, in trade paperback. When environmental consultant Jack McDarvid's boss is killed in a shootout near the Capitol, McDarvid becomes enmeshed in a diabolical plot behind the scenes of the environmental movement. In Strength And Shadow Dec 21 2021 Few rugby players have matched the achievements of Welshman Mervyn Davies, the shrewd, gutsy number 8 with the heart of a lion. In what was a remarkable career, he won two Grand Slams, three Triple Crowns, earned thirty-eight consecutive Wales caps, was captain of his national team and played in two victorious Lions tours. From the tail end of the 1960s through the first half of the glorious '70s period, 'Merv the Swerve' - with that mop of black hair and trademark headband - cut an iconic figure in the world's great rugby arenas. Teammates and opponents respected him, fans loved him and he was a natural leader of men both on and off the field. Then, in March 1976, everything changed. Mervyn was leading Swansea in a semi-final cup clash when he suffered a massive brain haemorrhage. He began that fateful Sunday preparing for just another high-profile game but ended it fighting for his life. Wales, and the watching sporting world, could do nothing but wait and hope. And just when the odds seemed stacked irreversibly against him, Mervyn did what he had always done: he beat them. Mervyn's life story is one of what was and what might have been. From locker-room tales to the loneliness of rehabilitation, Mervyn's account is funny, moving and honest. He writes about his many highs and lows, about losing rugby but regaining his life, and shares his thoughts on the days he spent in shadow and in strength.

Permissions, A Survival Guide May 02 2020 If a picture is worth a thousand words, then it's a good bet that at least half of those words relate to the picture's copyright status. Art historians, artists, and anyone who wants to use the images of others will find themselves awash in byzantine legal terms, constantly evolving copyright law, varying interpretations by museums and estates,

and despair over the complexity of the whole situation. Here, on a white—not a high—horse, Susan Bielstein offers her decades of experience as an editor working with illustrated books. In doing so, she unsnarls the threads of permissions that have ensnared scholars, critics, and artists for years. Organized as a series of “takes” that range from short sidebars to extended discussions, *Permissions, A Survival Guide* explores intellectual property law as it pertains to visual imagery. How can you determine whether an artwork is copyrighted? How do you procure a high-quality reproduction of an image? What does “fair use” really mean? Is it ever legitimate to use the work of an artist without permission? Bielstein discusses the many uncertainties that plague writers who work with images in this highly visual age, and she does so based on her years navigating precisely these issues. As an editor who has hired a photographer to shoot an incredibly obscure work in the Italian mountains (a plan that backfired hilariously), who has tried to reason with artists' estates in languages she doesn't speak, and who has spent her time in the archival trenches, she offers a snappy and humane guide to this difficult terrain. Filled with anecdotes, asides, and real courage, *Permissions, A Survival Guide* is a unique handbook that anyone working in the visual arts will find invaluable, if not indispensable.

Creating Effective Parenting Plans Feb 20 2022 According to these pediatric psychologists, the best interest of the child calls for a developmentally appropriate parenting plan—that is, custody that accurately reflects the child's physical and psychological development. Even now this concept often faces courtroom challenges as it can conflict with the traditional lawyer-client relationship. This book explores developing alternate parenting schedules (or custody) with the child's best interest and developmental needs considered first.

Mediocracy Dec 09 2020 There was no Reichstag fire. No storming of the Bastille. No mutiny on the Aurora. Instead, the mediocre have seized power without firing a single shot. They rose to power on the tide of an economy where workers produce assembly-line meals without knowing how to cook at home, give customers instructions over the phone that they

themselves don't understand, or sell books and newspapers that they never read. Canadian intellectual juggernaut Alain Deneault has taken on all kinds of evildoers: mining companies, tax-dodgers, and corporate criminals. Now he takes on the most menacing threat of all: the mediocre.

**Time of the Locust** Jan 10 2021 " . . . **Africa's Greatest Entrepreneurs** May 26 2022 Who are the real power brokers in Africa? Who are the dynamic entrepreneurs making things happen on the continent? Each chapter is dedicated to a single entrepreneur and focuses on a sometimes tumultuous, often challenging, but mostly exciting journey to success. **Of Gods and Monsters** Jan 28 2020 While Universal's Dracula and Frankenstein (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with *The Last Warning*, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's *The Shadow* short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

**Dear Dawn** Jan 22 2022 The chilling autobiography of the notorious female serial killer who was recently the subject of a two-hour Investigation Discovery special. Between 1989 and 1990, Aileen Wuornos, a hitchhiking prostitute, shot, killed, and robbed seven men in remote Florida locations. Arrested in 1991, she was condemned to death on six separate counts and executed by lethal injection in 2002. An abused runaway who turned to prostitution to survive, Wuornos has become iconic of vengeful women who lash out at the nearest target. She has also become a touchstone for women's, prostitutes', and prisoners' rights advocates. Her story has inspired myriad books and articles, as well as the 2003 movie *Monster*, for which Charlize Theron won an Academy Award. But until now, Wuornos's uncensored voice has never been heard. *Dear Dawn* is Wuornos's autobiography, culled from her ten-year death row correspondence with beloved childhood friend Dawn Botkins. Authorized for publication by Wuornos and edited under the guidance of Botkins, the letters not only offer Wuornos's riveting reflections on the murders, legal battles, and media coverage, but go further, revealing her fears and obsessions, her rich humor and empathy, and her gradual disintegration as her execution approached. A candid life story told to

a trusted friend, Dear Dawn is a compelling narrative, unwaveringly true to its source. "It is both empowering and heartbreaking, because Wuornos represents the fury of a wronged girl-gone-wild, whose rage was unleashed on men." —The Rumpus "Condenses ten years of obsessive correspondence into a fragmented, sometimes funny, sometimes nightmarish, often paradoxical portrait of Wuornos." —Muzzle Magazine

**Time Multiplexed Beam-Forming with Space-Frequency Transformation** Mar 31 2020 This book describes a unique approach to smart receiver system design. It starts with the analysis of a very basic, single-path receiver structure, then using similar methods, extends the analysis to a more complicated multi-path receiver. Within the multi-path structure, two different types of phased -array architectures are discussed: Analog beam-forming, and digital beam-forming. The pros and cons are studied, and the gaps are identified. Whereas previous books in this area focus mainly on phased-array circuit implementations, this book fills a gap by providing a system-level approach and introduces new methods for developing smart systems.

**Time, Space and Philosophy** Jul 04 2020 This book provides a comprehensive, up-to-date and accessible introduction to the philosophy of space and time. Time, Space and Philosophy extends the debate in many areas: absolute simultaneity is examined as well as black holes, the big bang and even time travel. Time, Space and Philosophy will be invaluable to the student of philosophy and science and will be of considerable interest to mathematics students. The clear, non-technical approach should also make it suitable for the general reader.

**By Reason of Insanity** Apr 12 2021 Stevens takes readers on a harrowing descent into the mind of a mass murderer in this eerily realistic serial-killer novel. At the center of this gripping epic novel of mass murder, pursuit, and psychological terror is Thomas Bishop, a psychotic young killer who believes he is the son of Caryl Chessman, who was executed for rape in California amid intense controversy. Subjected to unmerciful physical and mental torture from an early age, Bishop kills his mother at the age of ten and is placed in an institution for the criminally insane. He grows to manhood knowing the outside world only through a television screen. At twenty-five, he succeeds in a brilliant escape and change of identity and begins to move across the country, murdering women in particularly gruesome ways. Pursued by reporters, police, and the mob, Bishop manages to elude them all, and the search for him becomes the greatest manhunt in US history. The chilling denouement will hold readers spellbound until the shattering, unforgettable conclusion.
