A Reader in Planning Theory Feb 26 2020 Urban and Regional Planning Series, Volume 5: A Reader in Planning Theory focuses on the approaches, methodologies, applications, and mechanics involved in planning theory. The selection first elaborates on a choice theory of planning, sociological considerations in the evaluation of planning, and British town planning. Discussions focus on social scientific research and town planning ideology, town planning as part of broader social policy, critics of traditional planning, value formulation, means identification, and effectuation. The text then examines comprehensive planning and social responsibility and building the middle-range bridge for comprehensive planning. The publication takes a look at the science of "muddling through", beyond the middle-range planning bridge, and goals of comprehensive planning. Topics include comprehensiveness and

public interest, community development programming, non-comprehensive analysis, relations between means and ends, and successive comparisons as a system. The book also ponders on community decision behavior, a conceptual model for the analysis of planning behavior, and advocacy and pluralism in planning. The selection is a dependable reference for researchers interested in planning theory.

Zombie Theory Dec 06 2020 Essays portray the zombie not as a singular cultural figure or myth but show how the undead represent larger issues: the belief in an afterlife, fears of contagion and technology, the effect of capitalism and commodification, racial exclusion and oppression, dehumanization. As presented here, zombies are not simple metaphors; rather, they emerge as a critical mode for theoretical work. With its diverse disciplinary and methodological approaches, *Zombie Theory* thinks through what the walking undead reveal about our relationships to the world and to each other. The Monster Theory Reader Feb 20 2022 A collection of scholarship on monsters and their meaning—across genres, disciplines, methodologies, and time—from foundational texts to the most recent contributions *Zombies and vampires, banshees and basilisks, demons and wendigos, goblins, gorgons, golems, and ghosts. From the mythical monstrous races of the ancient world to the murderous cyborgs of our day, monsters have haunted the human imagination, giving shape to the fears and desires of their time. And as long as there have been monsters, there have*

been attempts to make sense of them, to explain where they come from and what they mean. This book collects the best of what contemporary scholars have to say on the subject, in the process creating a map of the monstrous across the vast and complex terrain of the human psyche. Editor Jeffrey Andrew Weinstock prepares the way with a genealogy of monster theory, traveling from the earliest explanations of monsters through psychoanalysis, poststructuralism, and cultural studies, to the development of monster theory per se—and including Jeffrey Jerome Cohen’s foundational essay “Monster Theory (Seven Theses),” reproduced here in its entirety. There follow sections devoted to the terminology and concepts used in talking about monstrosity; the relevance of race, religion, gender, class, sexuality, and physical appearance; the application of monster theory to contemporary cultural concerns such as ecology, religion, and terrorism; and finally the possibilities monsters present for envisioning a different future. Including the most interesting and important proponents of monster theory and its progenitors, from Sigmund Freud to Julia Kristeva to J. Halberstam, Donna Haraway, Barbara Creed, and Stephen T. Asma—as well as harder-to-find contributions such as Robin Wood’s and Masahiro Mori’s—this is the most extensive and comprehensive collection of scholarship on monsters and monstrosity across disciplines and methods ever to be assembled and will serve as an invaluable resource for students of the uncanny in all its guises. Contributors: Stephen T. Asma, Columbia College Chicago; Timothy K. Beal, Case Western Reserve U; Harry Benshoff, U of North Texas; Bettina Bildhauer, U of St. Andrews; Noel Carroll, The Graduate Center, CUNY; Jeffrey Jerome Cohen, Arizona State U; Barbara Creed, U of Melbourne; Michael Dylan Foster, UC Davis; Sigmund Freud; Elizabeth Grosz, Duke U; J. INTIMUS May 31 2020 Walter Benjamin observed in his writings on the interior that 'to live means to leave traces.' This interior design theory reader focuses on just how such traces might manifest themselves. In order to explore interior design's links to other disciplines, the selected texts reflect a wide range of interests extending beyond the traditional confines of design and architecture. It is conceived as a matrix, which intersects social, political, psychological, philosophical, technological and gender discourse, with practice issues, such as materials, lighting, colour, furnishing, and the body. The anthology presents a complex and sometimes conflicting terrain, while also creating a distinct body of knowledge particular to the interior. Locating theory on the interior through these multifarious sources, it encourages future discourse in an area often marginalised but now emerging in its own right. Within the reader individual excerpts are referenced to their place in the matrix and sequenced alphabetically. This organising strategy resists both a chronological and themed structure in order to provoke associations and inferences between excerpts. In this way the book offers the possibility of examining the interior from multiple vantage points: a disciplinary focus, the spatial and physical attributes of interiors, historical sequence, and topical issue based. Excerpts from Thomas Hope, Catherine E. Beecher and Harriet Beecher Stowe, Edith Wharton and Charles Eastlake provide contemporary nineteenth century accounts as the profession emerges, whereas Barbara Penner, Penny Sparke, Charles Rice, Georges Teyssot and Rebecca Houze offer re-interpretations of this period. The complexities of the twentieth-century interior are revealed by Robyn Longhurst, Kevin Melchionne, George Wagner, John Macgregor Wise, Joel Sanders and many others.

This second edition contains entirely new sections on fashion and sustainability, fashion and globalisation, fashion and digital/social media and fashion and the body/prosthesis. It also contains updated and revised sections on fashion, identity and difference, and on fashion and consumption and fashion as communication. More specifically, the section on identity and difference has been updated to include contemporary theoretical debates surrounding Islam and fashion, and LGBT+ communities and fashion and the section on consumption now includes theories of 'prosumption'. Each section has a specialist and dedicated Editor's Introduction which provides essential conceptual background, theoretical contextualisation and critical summaries of the readings in each section. Bringing together the most influential and ground breaking writers on fashion and exposing the ideas and theories behind what they say, this unique collection of extracts and essays brings to light the presuppositions involved in the things we all think and say about fashion. Theories of Reading Nov 17 2021 Why do literary theorists see reading as an act of dispassionate textual analysis and meaning production, when historical evidence shows that readers have often read excessively, obsessively, and for sensory stimulation? Posing these and other questions, this is the first major work to bring insights from book

history to bear on literary history and theory. In so doing, the book charts a compelling and innovative history of theories of reading. While literary theorists have greatly contributed to our understanding of the text-reader relation, they have rarely taken into account that the relation between a book and a reader is also a relation between two bodies: one made of paper and ink, the other flesh and blood. This is why, Karin Littau argues, we need to look beyond the words on the page, and pay attention to the technical innovations in the physical format of the book. Only then is it possible to understand more fully how media technology has changed our experience of reading, and why media history presents a challenge to our conceptions of what reading is. Each chapter places the reader in specific disciplinary and historical contexts: literature, criticism, philosophy, cultural history, bibliography, film, new media. Overall, the history recounted in this book points to a split between modern literary study which regards reading as a reducibly mental activity, and a tradition reaching back to antiquity which assumed that reading was not only about sense-making but also about sensation. *Theories of Reading: Books, Bodies and Bibliomania* will be essential reading for all students and scholars of literary theory and history as well as of great interest to students of the history of the book and new media.

Including a broad range of texts, the book offers a general introduction to the main writings of political sociology and social theory. While other texts tend to focus either on either traditional or contemporary figures, this Reader is unique in tracing a connecting strand from the work of Marx, Weber and Durkheim to more contemporary social theorists. And by focusing on the theories of social conflict, cohesion and consent it also acts as a guide to issues in sociological, political and cultural analysis. Modern Criticism and Theory Oct 24 2019 This third edition of *Modern Criticism and Theory* represents a major expansion on its previous incarnations with some twenty five new pieces or essays included. This expansion has two principal purposes. Firstly, in keeping with the collection's aim to reflect contemporary preoccupations, the reader has expanded forward to include such newly emergent considerations as ecocriticism and post-theory. Secondly, with the aim of presenting as broad an account of modern theory as possible, the reader expands backwards to take in exemplary pieces by formative writers and thinkers of the late nineteenth and early twentieth centuries such as Marx, Freud and Virginia Woolf.. This radical expansion of content is prefaced by a wide-ranging introduction, which provides a rationale for the collection and demonstrates how connections can be made between competing theories and critical schools. The purpose of the collection remains that of introducing the reader to the guiding concepts of contemporary literary and cultural debate. It does so by presenting substantial extracts from seminal thinkers and surrounding them with the contextual materials necessary to a full understanding. Each selection has a headnote, which gives biographical details of the author and provides suggestions for further reading, and footnotes that help explain difficult references. The collection is ordered both historically and thematically and readers are encouraged to draw for themselves connections between essays and theories. *Modern Criticism and Theory* has long been regarded as a necessary collection. Now revised for the twenty first century it goes further and provides students and the general reader with a wide-ranging survey of the complex landscape of modern theory and a critical

assessment of the way we think – and live – in the world today.
