Client executives will learn to recognize root causes of risk and sources of excellence to mitigate them. Well-developed strategic improvement is often constrained because the traditional way - current means and methods - fit squarely in everyone's comfort zone. By learning to ask the right questions, top-client leadership will soon render overruns from the best traditional systems as "not-good enough" and strive for a new level of excellence. EPC executives will better engage creative voices from their best resources and stakeholders to resolve all concerns and define a unified vision for how to deliver on clients' expectations without overruns during capital project delivery. Lean methods will effectively assure that vision, principles and best expectations are understood and implemented at the workplace. Department, discipline and stakeholder leaders will align and no longer frustrate each other and their clients. They will plan and execute with increased efficiency and effectiveness. Cost reduction will accelerate, retaining only client-valued quality - enabling a nimble response to market opportunities and threats. Project and program managers will confidently accept intense, market-induced cost and schedule-reduction efforts. They will apply new metrics, measure potential and extract, align and pilot improvements. They will make workplace progress transparent to simplify resource balancing, full utilization and workplace flow during all project phases. The results will differentiate team members and their project's performance on the world stage. Project professionals and the skilled labor force will gain confidence to make and keep increasingly difficult commitments and experience thereby increasing opportunity in an organization known for

excellence. They will fully engage heart and mind for leaders who expect excellence and they trust to enable and reward best practice performance while they jointly eliminate root causes of problems before they happen. This book guides readers through each essential role for the transformation to Lean...not just at the lowest levels but of the entire business model and all the supporting processes. Resulting market recognition of sustained excellence of people, their systems and they way they work together will create a market-leading force.

Winning with Risk Management Aug 15 2021 This book develops the notion that companies can

succeed on the basis of risk management, much as companies compete on efficiency, costs, labor, location, and other dimensions. The reality of risk and how it impacts companies is that it is much more definite, often catastrophic and looks more like a shock. This is striking, as a difference between firms on risk different than a marginal difference in operating efficiencies, for example. Competing on Risk Management requires a discipline, a commitment to using information and recognizing shocks and then acting upon those to redistribute assets. This book will examine how leading firms that compete on risk have done this and showcase best practices and impacts to the capital structure of firms and their organizational formation. Contents: Introduction to Risk Overview of Risk Decisions Dealing With Shocks — Large Scale Risks Impacting Markets and Industries Operations Pose Embedded Risks to the Enterprise Reliance on Technology Increases Operational Risk — Often It Is Not Obvious Dealing With Contagion and Persistence in Risks Risk Management as a Corporate Competency Protecting the Enterprise From Itself — Learning From History, Again Forming an Organization That Competes on Risk: Organizational Implications Developing a Culture for Sound Risk Management Toyota: Dealing With Crisis in a Major (Foreign) Market Communicating Risk Information in the Enterprise Benefits of Competing on Risk Readership: Business professionals and students interested in the topic of risk management. Dr. Walker provides strong historical context for risk and then explores how it impacts modern business organizations in diverse ways — from operational risk in the supply chain to technological risks inherent in digital processes. Drawing from theory and practice, Dr. Walker highlights various real-world cases of risk management, including examples from the 2008 recession. Television and Postfeminist Housekeeping Sep 03 2020 In this book, Nathanson examines how contemporary American television and associated digital media depict women's everyday lives as homemakers, career women, and mothers. Her focus on American popular culture from the 1990s through the present reveals two extremes: narratives about women who cannot keep house and narratives about women who only keep house. Nathanson looks specifically at the issue of time in this context and argues that the media constructs panics about domestic time scarcity while at the same time offering solutions for those very panics. Analyzing TV programs such as How Clean is Your House, Up All Night, and Supernanny, she finds that media's portrayals of women's time is crucial to understanding definitions of femininity, women's labor, and leisure in the postfeminist context.
