**Chicago's Block Clubs** Feb 02 2020 Whether focused on flower gardens, street crime, or aesthetic conformity, urban block clubs are unusual quasi-institutions that can establish or maintain a neighborhood's appearance, social dynamics, and quality of life. But what is a block club? And how does it function? Is it a definable institution, with codifiable practices and expectations, or is it merely an assemblage of like-minded citizens who happen to live near one another? What makes one such group effective and long-lasting, while most evaporate after a few years of communal activity? These are some of the questions that Amanda Seligman addresses in her deeply researched study."

**Food Fraud Prevention** Aug 02 2022 This textbook provides both the theoretical and concrete foundations needed to fully develop, implement, and manage a Food Fraud Prevention Strategy. The scope of focus includes all types of fraud (from adulterant-substances to stolen goods to counterfeits) and all types of products (from ingredients through to finished goods at retail). There are now broad, harmonized, and thorough regulatory and standard certification requirements for the food manufacturers, suppliers, and retailers. These requirements create a need for a more focused and systematic approach to understanding the root cause, conducting vulnerability assessments, and organizing and implementing a Food Fraud Prevention Strategy. A major step in the harmonizing and sharing of best practices was the 2018 industry-wide standards and certification requirements in the Global Food Safety Initiative (GFSI) endorsed Food Safety Management Systems (e.g., BRC, FSSC, IFS, & SQF). Addressing food fraud is now NOT optional - requirements include implementing a Food Fraud Vulnerability Assessment and a Food Fraud Prevention Strategy for all types of fraud and for all products. The overall prevention strategy presented in this book begins with the basic requirements and expands through the criminology root cause analysis to the final resource-allocation decision-making based on the COSO principle of Enterprise Risk Management/ERM. The focus on the root cause expands from detection and catching bad guys to the application of foundational criminology concepts that reduce the overall vulnerability. The concepts are integrated into a fully integrated and inter-connected management system that utilizes the Food Fraud Prevention Cycle (FFPC) that starts with a pre-filter or Food Fraud Initial Screening (FFIS). This is a comprehensive and all-encompassing textbook that takes an interdisciplinary approach to the most basic and most challenging questions of how to start, what to do, how much is enough, and how to measure success.

**Guidelines for Reporting Health Research** Jan 07 2023 Guidelines for Reporting Health Research is a practical guide to choosing and correctly applying the appropriate guidelines when reporting health research to ensure clear, transparent, and useful reports. This new title begins with an introduction to reporting guidelines and an overview of the importance of transparent reporting, the characteristics of good guidelines, and how to use reporting guidelines effectively in reporting health research. This hands-on manual also describes over a dozen internationally recognised published guidelines such as CONSORT, STROBE, PRISMA and STARD in a clear and easy to understand format. It aims to help researchers choose and use the correct guidelines for reporting their research, and to produce more completely and transparently reported papers which will help to ensure reports are more useful and are not misleading. Written by the authors of health research reporting guidelines, in association with the EQUATOR (Enhancing the QUALity and Transparency Of health Research) Network, Guidelines for Reporting Health Research is a helpful guide to producing publishable research. It will be a valuable resource for researchers in their role as authors and also an important reference for editors and peer reviewers.

**Migration and Security in the Global Age** Feb 25 2022 This book is an interdisciplinary examination of several interconnecting aspects of migrant communities in the context of contemporary conflict and security. The book illustrates that within this globalised world, migrants have become key actors, living in the spaces between states, as well as within them. Arguing that migrants and their descendants are vital and complex constituencies for the achievement of security in this global age, the volume uses a number of case studies, including Palestinian, Sri Lankan, Irish and Somali diaspora communities, to explore the different ways that such groups intersect with issues of security, and how these attitudes and behaviours have evolved in the context of political transnationalism and the global economy. Comparative and econometric studies of migration can provide a wide lens but at times fail to capture the depth and complexity of these communities and attitudes within them. At the same time, empirically focused studies are often case-specific and, while rich in local detail, lack comparative breadth or the ability to make connections and see irregularities across a number of contexts that might be of interest to scholars beyond that specific area. This book connects these literatures together more thoroughly. In particular, it demonstrates that political, cultural, economic and social factors all play important roles in helping us understand the actual (and potential) roles of migrant communities in conflict and the establishment of sustainable security within contemporary society. Lastly, given this context, the book seeks to examine the challenges and opportunities that exist, for such a sustainable security strategy to be developed. This book will be of much interest to students of migration and diaspora communities, peace and conflict studies, security studies and ethnic conflict.

**Concepts, Applications, Experimentation and Analysis of Wireless Sensor Networks** Oct 04 2022 The new edition of this popular book has been transformed into a hands-on textbook, focusing on the principles of wireless sensor networks (WSNs), their applications, their protocols and standards, and their analysis and test tools; a meticulous care has been accorded to the definitions and terminology. To make WSNs felt and seen, the adopted technologies as well as their manufacturers are presented in detail. In introductory computer networking books, chapters sequencing follows the bottom up or top down architecture of the seven layers protocol. This book starts some steps later, with chapters ordered based on a topic's significance to the elaboration of wireless sensor networks (WSNs) concepts and issues. With such a depth, this book is intended for a wide audience, it is meant to be a helper and motivator, for both the senior undergraduates, postgraduates, researchers, and practitioners; concepts and WSNs related applications are laid out, research and practical issues are backed by appropriate literature, and new trends are put under focus. For senior undergraduate students, it familiarizes readers with conceptual foundations, applications, and practical project implementations. For graduate students and researchers, transport layer protocols and cross-layering protocols are presented and testbeds and simulators provide a must follow emphasis on the analysis methods and tools for WSNs. For practitioners, besides applications and deployment, the manufacturers and components of WSNs at several platforms and testbeds are fully explored.

**The News: A User's Manual Sep 30 2019** The News: A User's Manual is an insightful analysis of the impact of the incessant news machine on us and our culture. The news is everywhere. We can't stop constantly checking it on our computer screens, but what is this doing to our minds? We are never taught how to make sense of the torrent of news we face daily, which has a huge influence on our sense of what matters and of how we should lead our lives. Alain de Botton takes twenty-five archetypal news stories—including an airplane crash, a murder, a celebrity interview, and a political scandal—and submits them to intense analysis. Why are disaster stories often so uplifting? Why do we enjoy watching politicians being brought down? Why are upheavals in far-off lands often so boring? What makes the love lives of celebrities so interesting? De Botton has written the ultimate guide for our frenzied era, designed to bring calm, understanding, and a measure of sanity to a news-obsessed age.

**On the Road to High-Quality Early Learning Oct 24 2021** This timely book will help policymakers and practitioners convert their visions of high-quality early education into on-the-ground reality by providing a much-needed, richly detailed look at how states can design, fund, and manage exemplary programs. The authors describe and analyze how four states—Michigan, West Virginia, Washington, and North Carolina—have built early education systems that positively affect student outcomes. Sharing a commitment to advancing key elements of a quality preschool education, each of the states developed programs with different enrollment requirements, services, and oversight. All of them, however, rely on common overarching strategies, such as: establishing standards and supporting improvement, investing in knowledgeable educators, coordinating and aligning early education programs with elementary school, seeking sufficient funding sources and mechanisms, and building broad-based support. This book offers powerful lessons for anyone who is committed to delivering engaging, age-appropriate preschool programs for all. "This book is so valuable—it's a 'how-to' for the current generation of political leaders, Republicans and Democrats alike, who want to develop early education policies and practices that work." —James B. Hunt, Jr., former Governor of North Carolina "This book provides critical insights for addressing the key challenge to preschool policy: fulfilling preschool's promise at scale." —W. Steven Barnett, National Institute for Early Education Research (NIEER) "A great resource for everybody engaged in state-level processes on behalf of young children, providing valuable lessons from leading states to help other states chart their own path." —Elliot Regenstein, Foresight Law + Policy "A detailed and fascinating account of how distributive leadership, collaboration, and professional learning can greatly and positively influence teachers' effective use of data." —Randi Weingarten, president, American Federation of Teachers

**The Sociology of Sports May 19 2021** This third edition takes a fresh approach to the study of sport, presenting key concepts such as socialization, race, ethnicity, gender, economics, religion, politics, deviance, violence, school sports and sportsmanship. While providing a critical examination of athletics, this text also highlights many of sports' positive features. This new edition includes significantly updated statistics, data and information along with updated popular culture references and real-world examples. Newly explored is the impact of several major world events that have left lasting effects on the sports realm, including a global pandemic (SARS-CoV-2, or COVID-19) and social movements like Black Lives Matter and Me Too. Another new topic is the "pay for play" movement, wherein college athletes demanded greater compensation and, at the very least, the right to profit from their own names, images and likenesses.

**WHO Expert Committee on Biological Standardization Jan 27 2022** This report presents the recommendations of a WHO Expert Committee commissioned to coordinate activities leading to the adoption of international recommendations for the production and control of vaccines and other biological substances and the establishment of international biological reference materials. Following a brief introduction the report summarizes a number of general issues brought to the attention of the Committee. The next part of the report of particular relevance to manufacturers and national regulatory authorities outlines the discussions held on the development and adoption of new and revised WHO Recommendations Guidelines and guidance documents. Following these discussions a WHO guidance document on the Scientific principles for regulatory risk evaluation on finding an adventitious agent in a marketed vaccine was adopted along with WHO Guidelines on procedures and data requirements for changes to approved vaccines and revised WHO Recommendations to assure the quality safety and efficacy of poliomyelitis vaccines (inactivated). Subsequent sections of the report provide information on the current status and proposed development of international reference materials in the areas of antibiotics; biotherapeutics other than blood products; blood products and related substances; in vitro diagnostic device reagents; and vaccines and related substances. A series of annexes are then presented which include an updated list of all WHO Recommendations Guidelines and other documents on biological substances used in medicine (Annex 1). The above three WHO documents adopted on the advice of the Committee are then published as part of this report (Annexes 2-4). Finally all additions and discontinuations made during the 2014 meeting to the list of International Standards Reference Reagents and Reference Panels for biological substances maintained by WHO are summarized in Annex 5. The updated full catalogue of WHO International Reference Preparations is available at: <http://www.who.int/bloodproducts/catalogue/en/>.

**WMD Arms Control in the Middle East Jan 03 2020** The Middle East is a hot spot of proliferation. It contains one state assumed to possess nuclear weapons, several states that tried and failed to develop a military nuclear capability, one state under suspicion of trying to do so, and it is the world region that witnessed the most frequent and severe employment of chemical weapons since the end of World War I. Notwithstanding, not a single arms control regime concerning weapons of mass destruction (WMD) covers the region as a whole. Instead we have seen several proliferation-related military operations which have rather contributed to destabilization than served non-proliferation. This volume, written under the auspices of the EU Consortium for Non-Proliferation and Disarmament determines the current state of diplomatic efforts to establish a WMD free zone in the Middle East. In doing so, it provides insights into central actors' conflicting political positions, thereby explaining the stalemate of efforts to negotiate a WMD-free zone. Chapters written by renowned experts from academia and policy-oriented think tanks, as well as by next-generation Middle East and arms control experts, introduce the subject to the reader, give background information about arms control initiatives, provide technical expertise, and endeavour to make proposals for arms control measures in support of the creation of a Middle East WMD-free zone.

**Human Rights Issues and Vulnerable Groups Jun 19 2021** This volume covers topics related to human rights issues and problems of people who are overwhelmed by hostile situations around them and are subsequently rendered vulnerable. The situations of vulnerability discussed in this book are related to suffering caused by the moral, family, social, economic or political conditions in which the people, and the groups they belong to, live. Readers are guided through a discussion about rights, as an instrument through which civil society and the 'Rule of Law' try to curb or even eliminate the suffering of these people. The aim of such efforts is to restore the situation of vulnerable people to a level of normality. Human Rights Issues and Vulnerable Groups presents a discussion of issues surrounding several kinds of vulnerable groups: minorities, children, gender groups, persons with disabilities, migrants, cultural groups, displaced persons, victims of terrorism, linguistic groups, poor people, people in prison and sexual minorities. The book is a detailed reference for graduates and scholars in law, political science, sociology and social psychology. The volume is also recommended for working professionals who operate with human rights groups and general readers (non-experts) who want to understand the discourse about human rights in a holistic (moral, legal, social, economic, and political) framework.

**A Mental Health-Psychology-Psychiatry Guide Dec 14 2020** This book is for anyone looking for both a lifeline to get away from feeling miserable to enlightenment which is simple once you know what it is. It's to see yourself as the pure being you are away from everything you've ever been

brainwashed by. Sounds simple but many people will live an entire lifetime and not realize they are pure beings with their own true natures who do not owe anything to the society around them except to pay bills and follow the laws. Most misery comes from not being who you are in your natural state. Watch any animal. Cage him up, he gets depressed and angry. Let him be free and he's happy. Most of us grow up to be slaves to some artificial value then wonder why we're not happy. This book covers it all from the truth to the conventional psychology and mental health dogma, ideas, treatments, therapies, hospitals, etc. The 115 volumes on psychology, mental health and mental problems are as follows: Volume 1. Psychobabble vs. Common-Sense Wisdom 1 Volume 2. Psychobabble vs. Common-Sense Wisdom 2 Volume 3. The Big Three Theories of Psychology Volume 4. The Biggest Social Science Frauds Volume 5. **Safety at Street Works and Road Works Aug 29 2019** This publication sets out the statutory requirements for signing, lighting, and guarding at street works and road works. This is the core reference manual for utility companies, local authorities, street work contractors and others whose day-to-day business involves street works (works by statutory undertakers and other utility companies etc) and road works (works to maintain or repair road infrastructure). The code, which covers all of the UK and includes national variations, is now compulsory for highway/road authorities in England, Wales and Northern Ireland. It applies to all single carriageway roads and dual carriageways with a speed limit of 40 mph or less. The code is now divided into three parts: Basic Principles, Operations, and Equipment and Vehicles; site layout diagrams have been redrawn to make them easier to understand. There is: increased emphasis on using risk assessment and guidance on what to consider in such assessments; strengthened guidance on providing for pedestrians and cyclists and new guidance on traffic control measures related to road closures, one-way working and temporary road obstructions; enhanced advice on other traffic control measures including works near tramways and railways, and mobile/short duration works; and updated advice on high visibility clothing and the signing and conspicuity requirements for work vehicles. Effective from 1 October 2014 when it will supersede the 2001 edition (ISBN 9780115519581).

**Immigration Detention Dec 26 2021** Before the turn of the century, few states used immigration detention. Today, nearly every state around the world has adopted immigration detention policy in some form. States practice detention as a means to address both the accelerating numbers of people crossing their borders, and the populations residing in their states without authorisation. This edited volume examines the contemporary diffusion of immigration detention policy throughout the world and the impact of this expansion on the prospects of protection for people seeking asylum. It includes contributions by immigration detention experts working in Australasia, the Americas, Europe, Africa and the Middle East. It is the first to set out a systematic comparison of immigration detention policy across these regions and to examine how immigration detention has become a ubiquitous part of border and immigration control strategies globally. In so doing, the volume presents a global perspective on the diversity of immigration detention policies and practices, how these circumstances developed, and the human impact of states exchanging individuals' rights to liberty for the collective assurance of border and immigration control. This text will be of key interest to scholars, students and practitioners of immigration, migration, public administration, comparative policy studies, comparative politics and international political economy. **HCI for Children with Disabilities Nov 24 2021** In this book the authors present an HCI principle-based approach to develop applications to assist

children with disabilities. Design knowledge related to developing complex solution for this audience is explained from an interaction design point of view. Different methodologies, models and cases studies are covered with the aim of helping practitioners to adopt any of the proposed techniques presented in this book. HCI methodologies that adopt an agile strategy are presented, including novel techniques at different development steps, such as: board games, agile planning, agile implementation, method engineering. As this is a huge research field the authors do not just focus on a specific disability but test their methods in different contexts with excellent results. Readers of this book will find both a well-organized and structured set of methodologies and also material that has been tested and refined throughout years of research. Using detailed case studies the reader is guided towards specific solutions which will also provide insights into how to address related problems.

**Cochrane Handbook for Systematic Reviews of Interventions** Oct 12 2020 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library ([www.thecochranelibrary.com](http://www.thecochranelibrary.com)). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

**Manual of Language Acquisition** May 31 2022 This manual contains overviews on language acquisition and distinguishes between first- and second-language acquisition. It also deals with Romance languages as foreign languages in the world and with language acquisition in some countries of the Romance-speaking world. This reference work will be helpful for researchers, students, and teachers interested in language acquisition in general and in Romance languages in particular.

**Enhancing Halal Sustainability** May 07 2020 The global halal industry is likely to grow to between three and four trillion US dollars in the next five years, from the current estimated two trillion, backed by a continued demand from both Muslims and non-Muslims for halal products. Realising the importance of the halal industry to the global community, the Academy of Contemporary Islamic Studies (ACIS), the Universiti Teknologi MARA Malaysia (UiTM) and Sultan Sharif Ali Islamic University (UNISSA) Brunei have organised the 4th International Halal Conference (INHAC) 2019 under the theme "Enhancing Halal Sustainability". This book contains selected papers presented at INHAC 2019. It addresses halal-related issues that are applicable to various industries and explores a variety of contemporary and emerging issues. It covers aspects of halal food safety, related services such as tourism and hospitality, the halal industry - including aspects of business ethics, policies and practices, quality assurance, compliance and Shariah governance Issues, as well as halal research and educational development. Highlighting findings from both scientific and social research studies, it enhances the discussion on the halal industry (both in Malaysia and internationally), and serves as an invitation to engage in more advanced research on the global halal industry.

**Working with Interpreters and Translators** Sep 10 2020 Working with Interpreters and Translators: A Guide for Speech-Language Pathologists and Audiologists offers state-of-the-art procedures to conduct interviews, assessments, and conferences with students with limited English language proficiency and their families. As no research base is available in the field of communicative disorders on this specific topic, the information presented in this guide is supported by a critical review of the literature on best practices in interpreting for international conferences and legal and medical fields. Furthermore, the authors' experience working with language interpreters and training professionals as well as graduate students in communicative disorders, makes this a very valuable resource for professionals, interpreters/translators, as well as undergraduate and graduate students. Federal and state laws specify that, if necessary, English-language learners (ELL) need to be assessed in their native language when referred for possible special education. The number of ELL students attending public schools across the nation has increased in the past few decades. There are not enough speech-language pathologists (SLPs) or audiologists who are proficient in the various languages spoken by ELL students--even in Spanish, the most common language spoken by ELL students in the United States. The next best solution is to conduct assessments in collaboration with a trained interpreter/translator. Key features include: \* Information and references for the most common languages spoken by ELL students \* Discussion of culturally based variables that need to be considered in the process of interviewing and working with linguistically and culturally diverse populations \*Description of the roles and responsibilities for individuals who will be collaborating as interpreters and translators with SLPs and audiologists in various contexts, such as interviews, assessments, and various meetings (such as IEPs and IFSPs), as well as suggestions on training individuals in this collaborative process \*Review of best practices in speech-language and audiological assessments, both with and without materials in the given language Disclaimer: Please note that ancillary content (such documents, audio, and video) may not be included as published in the original print version of this book. Working with Interpreters and Translators: A Guide for Speech-Language Pathologists and Audiologists is a must-have reference for anyone working with ELL students. Although the process was developed with the pediatric population in mind, much of this information can be applied to older culturally and linguistically diverse populations in need of speech-language and/or hearing services. It will also be useful to professionals working with language interpreters in allied health professions in other countries.

**Juvenile Justice in Global Perspective** Apr 05 2020 Provides a comparison of criminal justice and juvenile justice systems across the world, looking for points of comparison and policy variance that can lead to positive change in the United States. Contributors discuss important issues such as the relationship between political change and juvenile justice, the common labels used to unify juvenile systems in different regions and in different forms of government, the types of juvenile systems that exist and how they differ, and more. Furthermore, they use data on criminal versus juvenile justice in a wide variety of nations to create a new explanation of why separate juvenile and criminal courts are felt to be necessary. --From publisher description.
