Discovering the Brain Jan 16 2021 The brain ... There is no other part of the human anatomy that is so intriguing. How does it develop and function and why does it sometimes, tragically, degenerate? The answers are complex. In *Discovering the Brain*, science writer Sandra Ackerman cuts through the complexity to bring this vital topic to the public. The 1990s were declared the "Decade of the Brain" by former President Bush, and the neuroscience community responded with a host of new investigations and conferences. *Discovering the Brain* is based on the Institute of Medicine conference, *Decade of the Brain: Frontiers in Neuroscience and Brain Research*. *Discovering the Brain* is a "field guide" to the brain—an easy-to-read discussion of the brain's physical structure and where functions such as language and music appreciation lie. Ackerman examines: How electrical and chemical signals are conveyed in the brain. The mechanisms by which we see, hear, think, and pay attention—and how a "gut feeling" actually originates in the brain. Learning and memory retention, including parallels to computer memory and what they might tell us about our own mental capacity. Development of the brain throughout the life span, with a look at the aging brain. Ackerman provides an enlightening chapter on the connection between the brain's physical condition and various mental disorders and notes what progress can realistically be made toward the prevention and treatment of stroke and other ailments. Finally, she explores the potential for major advances during the "Decade of the Brain," with a look at medical imaging techniques—what various technologies can and cannot tell us—and how the public and private sectors can contribute to continued advances in neuroscience. This highly readable volume will provide the public and policymakers—and many scientists as well—with a helpful guide to understanding the many discoveries that are sure to be announced throughout the "Decade of the Brain."

Atomic Habits Jun 28 2019 The #1 New York Times bestseller. Over 4 million copies sold! Tiny Changes, Remarkable Results No matter your goals, *Atomic Habits* offers a proven framework for improving—every day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change, but because you have the wrong system for change. You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master their craft and vault to the top of their field. Learn how to: make time for new habits (even when life gets crazy); overcome a lack of motivation and willpower; design your environment to make success easier; get back on track when you fall off course; ...and much more. *Atomic Habits* will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits—whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal.

Essential Cell Biology Aug 23 2021 *Essential Cell Biology* provides a readily accessible introduction to the central concepts of cell biology, and its lively, clear writing and exceptional illustrations make it the ideal textbook for a first course in both cell and molecular biology. The text and figures are easy-to-follow, accurate, clear, and engaging for the introductory student. Molecular detail has been kept to a minimum in order to provide the reader with a cohesive conceptual framework for the basic science that underlies our current understanding of all of biology, including the biomedical sciences. The Fourth Edition has been thoroughly revised, and covers the latest developments in this fast-moving field, yet retains the academic level and length of the previous edition. The book is accompanied by a rich package of online student and instructor resources, including over 130 narrated movies, an expanded and updated Question Bank. *Essential Cell Biology, Fourth Edition* is additionally supported by the Garland Science Learning System. This homework platform is designed to evaluate and improve student performance and allows instructors to select assignments on specific topics and review the performance of the entire class, as well as individual students, via the instructor dashboard. Students receive immediate feedback on their mastery of the topics, and will be better prepared for lectures and classroom discussions. The user-friendly system provides a convenient way to engage students while assessing progress. Performance data can be used to tailor classroom discussion, activities, and lectures to address students' needs precisely and efficiently. Solomon Jul 30 2019 Accelerated Reader Quiz available: #117017 Eleven-year-old Solomon Freeman and his parents, newly freed slaves, are building a homestead in north Florida's wilderness, living their dream of independence. Their battle to survive is filled with harsh difficulties in this wild and fickle new home, and they all work long, hard days. Solomon's father, Moses, dreams of his only son sharing his love for the land. Lela, his mother, tries to shield Solomon from his father's expectations, for she knows that the boy's heart is not in the fields. Solomon is a natural woodsman, good at fishing and hunting. Though these skills bring food to their meager table, Moses wants his son to concentrate on farming. Further distancing father and son is the arrival of a refined Virginian brandishing a fifteen-foot whip with deadly precision. Solomon is captivated by the man and the whip while Moses despises the whip and dreads his son's fascination with the newcomer. Lela struggles to make a home, keep peace between her husband and son, and continue Solomon's education as they fight to survive. When the chance comes to go on a cattle drive, Solomon jumps at it—though his parents are reluctant to let him go. He confronts a new world as he rides a Florida marshstakie horse, wields his whip rounding up a large herd of wild cattle, and brings them to market at the coast—where he sees sights he had never dreamed existed. Are the Freemans strong enough to build a successful homestead? Will they be welcomed in this hard place where blacks have only been slaves in years past? Will the family seal its bond through shared hardship or splinter irreparably? Does Solomon have the wisdom he needs to face challenges beyond his years and see the family through its perils? Books and Reading in the Lives of Notable Americans Jul 10 2020 Books and reading have contributed to the success of generations of Americans, many of whom have had distinguished careers and have left their mark on history. While the accomplishments of these notable Americans are well known, their adventures with books and reading are less familiar. This book discusses the reading activities of 50 notable Americans from a wide range of historical periods and professions and from diverse racial and ethnic backgrounds. Many of these figures appear prominently in school and college texts or are part of popular culture. Included are alphabetically arranged entries for such readers as Benjamin Franklin, Helen Keller, Kareem Abdul-Jabbar, Mark Twain, Oprah Winfrey, and Ronald Reagan.
