*The Cambridge History of Ireland: Sep 03 2020* This volume offers fresh perspectives on the political, military, religious, social, cultural, intellectual, economic, and environmental history of early modern Ireland and situates these discussions in global and comparative contexts. The opening chapters focus on 'Politics' and 'Religion and War' and offer a chronological narrative, informed by the re-interpretation of new archives. The remaining chapters are more thematic, with chapters on 'Society', 'Culture', and 'Economy and Environment', and often respond to wider methodologies and historiographical debates. Interdisciplinary cross-pollination - between, on the one hand, history and, on the other, disciplines like anthropology, archaeology, geography, computer science, literature and gender and environmental studies - informs many of the chapters. The volume offers a range of new departures by a generation of scholars who explain in a refreshing and accessible manner how and why people acted as they did in the transformative and tumultuous years between 1550 and 1730.

*History of Nordic Computing 2* Aug 27 2022 The First Conference on the History of Nordic Computing (HiNC1) was organized in Trondheim, in June 2003. The HiNC1 event focused on the early years of computing, that is the years from the 1940s through the 1960s, although it formally extended to year 1985. In the preface of the proceedings of HiNC1, Janis Bubenko, Jr., John Impagliazzo, and Arne Sølvberg describe well the peculiarities of early Nordic computing [1]. While developing hardware was a necessity for the first professionals, quite soon the computer became an industrial product. Computer scientists, among others, grew increasingly interested in programming and application software. Progress in these areas from the 1960s to the 1980s was experienced as astonishing. The developments during these decades were taken as the focus of HiNC2. During those decades computers arrived to every branch of large and medium-sized businesses and the users of the computer systems were no longer only computer specialists but also people with other main duties. Compared to the early years of computing before 1960, where the number of computer projects and applications was small, capturing a holistic view of the history between the 1960s and the 1980s is considerably more difficult. The HiNC2 conference attempted to help in this endeavor.

*A History of East African Theatre, Volume 2* Oct 05 2020 This book is the first ever transnational theatre study of an African region. Covering nine nations in two volumes, the project covers a hundred years of theatre making across Burundi, Djibouti, Eritrea, Ethiopia, Kenya, Rwanda, Somalia, Tanzania, and Uganda. This volume focuses on the theatre of the Horn of Africa. The book shows how the theatres of Djibouti, Eritrea, Ethiopia, and Somalia, little known in the outside world, have been among the continent's most politically important, commercially successful, and widely popular; making work almost exclusively in local languages and utilizing hybrid forms that have privileged local cultural modes of production. A History of African Theatre is relevant to all who have interests in African cultures and their relationship to the history and politics of the East African region.

*The agrarian history of England and Wales. 7, 1850 - 1914 : Pt. 2* Mar 29 2020 The period between the repeal of the Corn Laws and the Great War is crucial for an understanding of present-day rural and agricultural issues. The unifying theme of this volume is the changing role of the countryside in national life, and the impact upon it of the social and economic forces unleashed by industrialisation and the growth of towns. Science and technology held out the prospect of unprecedented advances in agricultural output and productivity but, by 1914, English agriculture had lost its 'headship among industries', and technical supremacy among nations. It now produced less than one-tenth of national income and employment, and less than half the nation's food. Only one-fifth of the population was classified as 'rural'; most traditional rural crafts had long since decayed; and the social and political position of the landowning classes had been seriously weakened.

*Inquiry-Based Lessons in World History (Vol. 2)* Feb 18 2022 Spanning the time period from 750 CE to the present day, *Inquiry-Based Lessons in World History (Vol. 2)* focuses on creating global connections between people and places using primary sources in standards-based lessons. With sections on the world in transition, the era of revolutions, imperialism and global war, and the modern world, this book provides teachers with inquiry-based, ready-to-use lessons that can be adapted to any classroom and that encourage students to take part in the learning process by reading and thinking like historians. Each section contains four chapters that correspond to the scope and sequence of most world history textbooks. Each inquiry lesson begins with an essential question and connections to content and literacy standards, followed by primary source excerpts or links to those sources. Lessons include step-by-step directions, incorporate a variety of literacy strategies, and require students to make a hypothesis using evidence from the texts they have read.

*Sources in British Political History, 1900-1951* Dec 19 2021 From 1970 to 1977 a major project to uncover source material for students of contemporary British history and politics was undertaken at the British Library of Political and Economic Science. Financed by the Social Science Research Council, and under the direction of Dr Chris Cook, this project has attempted a unique and systematic operation to locate, and then to make readily available, those archives that provide the indispensable source material for the contemporary historian. This volume (the fifth in the series) provides a guide to the papers of propagandists who were influential in British public life. Included in this volume are the papers of such persons as newspaper editors, leading economists, social reformers, socialist thinkers, trade unionists, industrialists and a variety of theologians and philanthropists. In all, this volume not only completes the findings of the project but opens up the archive sources of a hitherto neglected area of research into contemporary social and political history.

*A Companion to the History of the Book* Dec 31 2022 A COMPANION TO THE HISTORY OF THE BOOK A COMPANION TO THE HISTORY OF THE BOOK Edited by Simon Eliot and Jonathan Rose "As a stimulating overview of the multidimensional present state of the field, the Companion has no peer." Choice "If you want to understand how cultures come into being, endure, and change, then you need to come to terms with the rich and often surprising history Of the book ... Eliot and Rose have done a fine job. Their volume can be heartily recommended. " Adrian Johns, *Technology and Culture* From the early Sumerian clay tablet through to the emergence of the electronic text, this Companion provides a continuous and coherent account of the history of the book. A team of expert contributors draws on the latest research in order to offer a cogent, transcontinental

narrative. Many of them use illustrative examples and case studies of well-known texts, conveying the excitement surrounding this rapidly developing field. The Companion is organized around four distinct approaches to the history of the book. First, it introduces the variety of methods used by book historians and allied specialists, from the long-established discipline of bibliography to newer IT-based approaches. Next, it provides a broad chronological survey of the forms and content of texts. The third section situates the book in the context of text culture as a whole, while the final section addresses broader issues, such as literacy, copyright, and the future of the book. Contributors to this volume: Michael Albin, Martin Andrews, Rob Banham, Megan L Benton, Michelle P. Brown, Marie-Françoise Cachin, Hortensia Calvo, Charles Chadwyck-Healey, M. T. *The History Manifesto* Sep 23 2019 How should historians speak truth to power – and why does it matter? Why is five hundred years better than five months or five years as a planning horizon? And why is history – especially long-term history – so essential to understanding the multiple pasts which gave rise to our conflicted present? *The History Manifesto* is a call to arms to historians and everyone interested in the role of history in contemporary society. Leading historians Jo Guldi and David Armitage identify a recent shift back to longer-term narratives, following many decades of increasing specialisation, which they argue is vital for the future of historical scholarship and how it is communicated. This provocative and thoughtful book makes an important intervention in the debate about the role of history and the humanities in a digital age. It will provoke discussion among policymakers, activists and entrepreneurs as well as ordinary listeners, viewers, readers, students and teachers. This title is also available as Open Access.

*Women in India: A Social and Cultural History* [2 volumes] Jun 24 2022 Are Indian women powerful mother goddesses, or domestic handmaidens trailing behind men in literacy, wages, opportunities, and rights? Have they been agents of their own destinies, or voiceless victims of patriarchy? Behind these colorful over-simplifications lies the reality of many feminine personas belonging to various classes, ethnicities, religions, and castes. This two-volume set looks at Indian history from ancient to modern times, revealing precisely why ideas of gender rights were not static across eras or regions. Raman's work is a reflection on the various ways in which women in a non-Western culture have developed and expressed their own feminist agenda. Raman's work is a reflection on the various ways in which women in a non-western culture have developed and expressed their own feminist agenda. Individual chapters highlight the enduring legacies of many important male and female figures, illustrating how each played a key role in modifying the substance of women's lives. Political movements are examined as well, such as the nationalist reform movement of 1947 in which the ideal of Indian womanhood became central to the nation and the push for independence. Also included is a survey of women in contemporary India and the role they played in the resurgence of militant Hindu nationalism. Aside from being an engaging and readable narrative of Indian history, this set integrates women's issues, roles, and achievements into the general study of the times, providing a clear presentation of the social, cultural, religious, political, and economic realities that have helped shape the identity of Indian women.

*The Cambridge History of Japan* Jan 08 2021 This volume provides the most comprehensive treatment in Western literature of the Heian period, the Japanese imperial court's golden age.

*Cartography* Dec 27 2019 Over the past four decades, the volumes published in the landmark *History of Cartography* series have both chronicled and encouraged scholarship about maps and mapping practices across time and space. As the current director of the project that has produced these volumes, Matthew H. Edney has a unique vantage point for understanding what "cartography" has come to mean and include. In this book Edney disavows the term cartography, rejecting the notion that maps represent an undifferentiated category of objects for study. Rather than treating maps as a single, unified group, he argues, scholars need to take a processual approach that examines specific types of maps—sea charts versus thematic maps, for example—in the context of the unique circumstances of their production, circulation, and consumption. To illuminate this bold argument, Edney chronicles precisely how the ideal of cartography that has developed in the West since 1800 has gone astray. By exposing the flaws in this ideal, his book challenges everyone who studies maps and mapping practices to reexamine their approach to the topic. The study of cartography will never be the same.

*History of Mathematics* Sep 27 2022 Within this two-volume edition, Professor Smith covers the entire history of mathematics in the Near and Far East and the West, from primitive number concepts to the calculus. His account is distinguished by impeccable scholarship combined with unusual clarity and readability. Footnotes add many technical points outside the book's actual line of development and direct the reader to disputed matters and source readings. Hundreds of illustrations from Egyptian papyri, Hindu, Chinese, and Japanese manuscripts, Greek and Roman texts, Medieval treatises, maps, portraits, etc. are used along with modern graphs and diagrams. Every major figure from Euclid to Descartes, Gauss,

and Riemann and hundreds of lesser-known figures — Theon of Smyrna, Rabbi ben Ezra, Radulph of Laon, Mersenns, Benedetti, and more — are considered both with respect to specific problems and with an awareness of their overall influence on mathematics. Volume II: Special Topics, considering mathematics in terms of arithmetic geometry, algebra, trig, calculus, calculating machines, and other specific fields and problems. 192 Topics for Discussion. 195 illustrations. Index. Victorian Britain Nov 17 2021

The Early Modern World Nov 29 2022 The Heinemann History Scheme offers an opportunity to refresh the approach to teaching at Key Stage 3. End of History and the Last Man Aug 22 2019 Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.

History of the Arabic Written Tradition Volume 2 Jul 02 2020 The present English translation reproduces the original German of Carl Brockelmann's *Geschichte der Arabischen Litteratur (GAL)* as accurately as possible. In the interest of user-friendliness the following emendations have been made in the translation: Personal names are written out in full, except b. for ibn; Brockelmann's transliteration of Arabic has been adapted to comply with modern standards for English-language publications; modern English equivalents are given for place names, e.g. Damascus, Cairo, Jerusalem, etc.; several erroneous dates have been corrected, and the page references to the two German editions have been retained in the margin, except in the Supplement volumes, where new references to the first two English volumes have been inserted.

Profiles from History Vol.2 Mar 22 2022

The Landscape of History Feb 06 2021 What is history and why should we study it? Is there such a thing as historical truth? Is history a science? One of the most accomplished historians at work today, John Lewis Gaddis, answers these and other questions in this short, witty, and humane book. *The Landscape of History* provides a searching look at the historian's craft, as well as a strong argument for why a historical consciousness should matter to us today. Gaddis points out that while the historical method is more sophisticated than most historians realize, it doesn't require unintelligible prose to explain. Like cartographers mapping landscapes, historians represent what they can never replicate. In doing so, they combine the techniques of artists, geologists, paleontologists, and evolutionary biologists. Their approaches parallel, in intriguing ways, the new sciences of chaos, complexity, and criticality. They don't much resemble what happens in the social sciences, where the pursuit of independent variables functioning with static systems seems increasingly divorced from the world as we know it. So who's really being scientific and who isn't? This question too is one Gaddis explores, in ways that are certain to spark interdisciplinary controversy. Written in the tradition of Marc Bloch and E.H. Carr, *The Landscape of History* is at once an engaging introduction to the historical method for beginners, a powerful reaffirmation of it for practitioners, a startling challenge to social scientists, and an effective skewering of post-modernist claims that we can't know anything at all about the past. It will be essential reading for anyone who reads, writes, teaches, or cares about history.
