From simple geometric patterns to fascinating fractal art, to awesome anamorphic art, and cool celtic knots, discover the beauty in maths, and the maths in beauty. Left-brain and right-brain come together to create fantastic maths art!

**A Guide Book to Mathematics** Nov 24 2021 **TO THE FIRST RUSSIAN EDITION** It was a very difficult task to write a guide-book of a small size designed to contain the fundamental knowledge of mathematics which is most necessary to engineers and students of higher technical schools. In our tendency to the compactness and brevity of the exposition, we attempted, however, to produce a guide-book which would be easy to understand, convenient to use and as accurate as possible (as much as it is required in engineering). It should be pointed out that this book is neither a handbook nor a compendium, but a guide-book. Therefore it is not written as systematically as a handbook should be written. Hence the reader should not be surprised to find, for example, L'Hôpital's rule in the section devoted to computation of limits which is a part of the chapter "Introduction to the analysis" placed before the concept of the derivative, or information about the Gamma function in the chapter "Algebra"-just after the concept of the factorial. There are many such "imperfections" in the book. Thus a reader who wants to acquire certain information is advised to use not only the table of contents but also the alphabetical index inserted at the end of the book. If a problem mentioned in the text is explained in detail in another place of the book, then the corresponding page is indicated in a footnote.

**Essential Maths Skills for AS/A Level Business** Jan 07 2023 The worked examples and guided questions are invaluable, and are a particular strength of this text, as they help to prepare the students to tackle the practice questions. Having exam-style questions (at the end) is another very good feature of this book. All of the examples and questions use appropriate and relevant business-related scenarios ... I am confident that this book will achieve the aim of helping A/AS Business students develop their maths skills and enhance their understanding of the subject. Michaela Cottee, Principal Lecturer in Statistics, Hertfordshire Business School. If you struggle with calculating profit or working out unit costs, this is the book for you. This textbook companion will help improve your essential maths skills for business, whichever awarding body specification you're following. You can use it throughout your course, whenever you feel you need some extra help. - Develop your understanding of both maths and business with all worked examples and questions within a business context - Improve your confidence with a step-by-step approach to every maths skill - Measure your progress with guided and non-guided questions to see how you're improving - Understand where you're going wrong with full worked solutions to every question - Feel confident in expert guidance from experienced teacher Charlotte Wright and Principal Examiner Mike Pickerden; reviewed by Dr Michaela Cottee, Principal Lecturer in Statistics at Hertfordshire Business School.
