Drawings Jan 10 2021 First published in 1983. In this comprehensive volume, Dr. Di Leo once again brings to the

reader the fruitful combination of extensive knowledge of children's drawings and an approach to the subject that is intimate and humane, but highly sophisticated. Those familiar with his books have come to expect the lucid style with which Dr. Di Leo leads the clinician toward incisive interpretations of children's drawings, pointing out key features and using, where appropriate, parallels from the world of art and literature. His discussions of over 120 drawings reproduced in this volume cover an astonishing range of topics, including: Interpretation, Formal and Stylistic Features, Mostly Cognition (drawing a man in a boat), Mostly Affect (drawing a house), Projective Significance of Child Art, The Whole and Its Parts, Global Features, Body Parts, Sex Differences and Sex Roles in Western Society as Perceived by Children, Laterality and Its Effects on Drawing, Tree Drawings, and Personality Traits, Emotional

Disorder Reflected in Drawings, Pitfalls, Role of the Arts in Education for Peace, and Reflections. In his analyses, Dr. Di Leo skillfully singles out examples of overinterpretation and other pitfalls, and answers questions such as: What does the therapist do when the child refuses to draw the family? Is the drawing a self-image? What are the differences between regressive drawings compared with the immature drawings of normal children? Even such fascinating topics as art brut, creativity, madness, and child art are discussed. The reader will find thought-provoking both the author's astute analyses and his keen awareness of the influence of society on children and the pictures they draw. Therapists in the field will find the book remarkably penetrating, while students in the field will delight in its clarity and thoroughness. Everyone who works with the drawings of children will find it absorbing.

youth worth a man's soul? The exceptionally handsome Dorian Gray is a model—and the muse—for a young artist, Basil Hallward. Through Basil, Dorian meets Lord Henry Wotton, who values only the pleasurable things in life with no regard for morality. He makes Dorian realize that one day his famed beauty will fade, and he will be left with nothing. Dorian decides to sell his soul so that a portrait of him will age in his place. The Giving Tree Jun 14 2021

As The Giving Tree turns fifty, this timeless classic is available for the first time ever in ebook format. This digital edition allows young readers and lifelong fans to continue the legacy and love of a classic that will now reach an even wider

audience. "Once there was a tree...and she loved a little boy." So begins a story of unforgettable perception, beautifully written and illustrated by the gifted and versatile Shel Silverstein. This moving parable for all ages offers a touching interpretation of the gift of giving and a serene acceptance of another's capacity to love in return. Every day the boy would come to the tree to eat her apples, swing from her branches, or slide down her trunk...and the tree was happy. But as the boy grew older he began to want more from the tree, and the tree gave and gave and gave. This is a tender story, touched with sadness, aglow with consolation. Shel Silverstein's incomparable career as a bestselling children's book author and illustrator began with *Lafcadio, the Lion Who Shot Back*. He is also the creator of picture books including *A Giraffe and a Half, Who Wants a Cheap Rhinoceros?*, *The Missing Piece*, *The Missing Piece Meets the Big O*, and the perennial favorite *The Giving Tree*, and of classic poetry collections such as *Where the Sidewalk Ends*, *A Light in the Attic*, *Falling Up*, *Every Thing On It*, *Don't Bump the Glump!*, and *Runny Babbit*. Psychological Experts in Divorce Actions Jul 28 2022 Emotionally charged issues abound in matrimonial

practice, especially in custody disputes. Expert testimony can have a dramatic impact on the outcome of a case, and when matters are highly sensitive or sensational the seeming objectivity of an expert can be dispositive. To effectively reinforce or question that testimony, certain specialized knowledge is essential. Scientifically accepted standards and theories are constantly evolving. Keeping up with the data had been a challenge, but one integrated resource has made it simple. Aspen Publishers' Psychological Experts in Divorce Actions pulls all the research together into the definitive guide to understanding the role of psychological evaluations in divorce and custody actions. Focused on providing the best approach to protecting your client's interests, this work explains all the leading testing instruments, what conclusions may be drawn and how to challenge or support those conclusions. In addition to offering effective examination and cross-examination strategies, it assists you in handling the gamut of psychological factors that affect clients in divorce and custody cases. Authors Marc J. Ackerman, Ph.D., and Andrew W. Kane, Ph.D., are licensed psychologists who have been involved in hundreds of custody cases. Drawing on their extensive experience—testing parties to a divorce and treating psychological patients in the clinic—and as psychological experts in the courtroom, they identify the

most important psychological evaluation research used in divorce and custody decision-making and distill the information into clear terms lawyers can readily apply. They also examine vital issues including: Ethics—confidentiality, privilege, duty to warn or protect (Tarasoff), sharing raw data, test integrity Sexual abuse—bona fide or fabricated allegations, psychological effects of sexual abuse, profiles of abuser and abused Testing—personality tests (including MMPI-2, And The new MMPI-2-RF, Rorschach, Millon, TAT); intelligence tests (Wechsler scales, Kaufman scales, Stanford Binet); custody tests (ASPECT, PCRI, PASS, BPS); and many more How divorce affects families—custody, placement, age and gender differences, grandparents, sexual preference, psychological problems Exploring the Child's Personality Sep 05 2020 The objective of this book is to provide readers with a comprehensive account of the child's personality. The book examines in detail significant personality dimensions from developmental, clinical and cross-cultural perspectives. The intricacies of personality are exposed by means of the Fairy Tale Test, an instrument that attempts to track the preconscious and unconscious processes that occur beneath the behavioral and overt manifestations of personality. Children's responses to the FTT questions are assessed

both from a quantitative and a qualitative perspective. Twenty-nine personality variables are used to rate the broad range of personality characteristics. No other personality test assesses such a large number of personality parameters. The qualitative evaluation of responses includes the analysis of 14 defense mechanisms, the study of the nature of anxiety, family dynamics, and the examination of ego integration and ego strength. The unique quality of this book is the use of the FTT in the exploration of the child's personality, using large samples of children derived from diverse cultures. Additional advantages of this book are the chapters which focus on the research into two significant personality traits: aggression and ambivalence and the chapter on the analysis of idiosyncratic responses; the latter offers valuable information in the classification of original responses into levels of psychopathology. While the FTT has taken significant steps towards becoming a valid and reliable instrument, studies of its psychometric properties are an ongoing process. The book also includes examples, case studies and appendices for further study and review." **EDUCATION & SCIENCE 2022-II** May 02 2020 ART THERAPY APPROACHES FOR CHILDREN WITH SPECIAL EDUCATIONAL NEEDS Olivera RASHIKJ CANEVSKA, Nergis RAMO AKGÜN SYSTEMS APPROACH TO INSTRUCTIONAL DESIGN Ali BAYKAL ENGLISH AS A FOREIGN LANGUAGE

Interpreting Projective Drawings May 26 2022 The use of drawings to discover emotions, attitudes, and personality traits not verbally stated by a client is a valuable and widely used technique in psychoanalysis and psychotherapy. In this book, the author offers a highly practical introduction to the use and interpretation of projective drawings. Grounding his approach in self psychology, Dr. Leibowitz provides detailed information on how to interpret house, tree, man, woman, and animal drawings. By pairing clinical case examples with general interpretation guidelines, the book offers a thorough examination of projective drawings, making it a valuable text for beginners and an important reference source for the seasoned clinician. Interpreting Projective Drawings contains an

impressive array of drawings, with over 175 total illustrations. Almost half of these drawings are from comprehensive case studies that follow adult patients from the beginning phase of treatment to their one-year (or more) status. These include over 30 chromatic illustrations that clearly demonstrate the importance of color in projective drawing interpretation. In addition to detailed information on how to interpret these five types of achromatic and chromatic drawings, the book also contains an appendix that offers examiner instructions, instructions for self-administration, and adjective lists to aid in interpretation. Together, these components make Interpreting Projective Drawings an essential resource for any mental health professional interested in using drawings to their fullest effect in their practice.

The House-Tree-Person

Technique Revised Manual Nov 07 2020 House-Tree-Person is a projective personality test, wherein a person responds to a given stimuli, and the responses give clues about the person's hidden emotions or internal conflicts. The individual taking the test is asked to draw primary objects like a house, tree, and a person; that's why the name. These drawings render a measure of self perceptions and attitudes inherent in a personality. The HTP test is adhered to, along with other techniques, in cases where there is likelihood of brain damage, other neurological disorders, or to evaluate brain damage in patients of schizophrenia. It can be taken in any language by anyone who is 3 years old or above. The test consumes around 150 minutes. The person taking the test is first asked to draw, and then is later questioned based on his/her illustration. Usually, the first phase of drawing is colored using crayons, and then pencil is used for the next phase. The instructions given to the test-taker are quite short and simple. "Draw me as good a house as you can", states it well. Once the picture of a house is completed, the test-taker is asked to draw a tree,

and later a person. If we are told to draw some object, we might either shy away (for not being good at it) or we might enjoy the process itself (regardless of our artistic abilities). Whichever way, drawing gives us a sense of revisiting our childhood memories full of such fun activities. Similar to writing, the act of drawing forms a powerful medium for us to let our emotions out. As we know, and some of us might even have experienced, that forms of fine art, including drawing, are seen to be stress-releasing activities. Off the mind and onto the paper. This is the knack behind a psychological personality test like the House-Tree-Person test. It is like reading our minds from what we have scribbled or sketched on a sheet of paper. This test is a technique developed by John N. Buck, an early clinical psychologist in 1948, which was later updated in 1969. This, and such other contributions from him are remarkable.

Arts - Therapies -

Communication European Arts

Therapy Dec 09 2020 The theoretical and practical formation of European Art Therapy as a discipline requires establishing communication with theorists and practitioners in other continents or countries. Accomplishing this requires two approaches. A more theoretical approach uses European Art Therapy as a research and teaching tool. A more practical approach seeks experiences in common, as well as quantitative and qualitative investigations, which in turn

lead to theoretical-methodical conclusions. The contributions in this volume employ both approaches. Individual articles cannot, of course, fully describe the extent of art therapy throughout Europe, but they are a source of information and inspiration for readers. Whether theorists or practitioners, readers will find articles that address their particular concerns, enabling them to find tools they can use in their own specific work.
