[Understanding the Divorce Cycle](#) Aug 09 2020 Growing up in a divorced family leads to a variety of difficulties for adult offspring in their own partnerships. One of the best known and most powerful is the divorce cycle, the transmission of divorce from one generation to the next. This book examines how the divorce cycle has transformed family life in contemporary America by drawing on two national data sets. Compared to people from intact families, the children of divorce are more likely to marry as teenagers, but less likely to wed overall, more likely to marry people from divorced families, more likely to dissolve second and third marriages, and less likely to marry their live-in partners. Yet some of the adverse consequences of parental divorce have abated even as divorce itself proliferated and became more socially accepted. Taken together, these findings show how parental divorce is a strong force in people's lives and society as a whole.

[Painful Partings](#) Jul 08 2020 The book covers emerging alternatives to litigation - like mediation, and looks at sensitive legal matters, such as physical and emotional abuse and child custody. It also examines timely issues like fathers' rights, mid-life divorce, and what happens when one partner exits a marriage in order to lead a homosexual lifestyle.

Portrait of Divorce Jan 26 2022 Despite the increase of research on divorce, relatively little is known about such topics as how men adjust to divorce compared with women, how blacks adjust compared to whites, and what divorce adjustment looks like over time. Filling a gap in the literature, PORTRAIT OF DIVORCE presents a comprehensive and detailed report on the causes and consequences of divorce. Inclusive in its scope, the book covers the period of estrangement through the divorce process and on to 4 years after the couples separated. The work is based on the integration of original data with over 50 years of prior research. In addition, it contrasts divorcing people with a comparable sample of people who remain in intact marriages. The book opens with a discussion of today's changing attitudes about marriage and the resulting mixed view of divorce. A new model of divorce adjustment--one that integrates the pathology and crisis models of adjustment and includes elements of loss and change--is outlined. The four sources of study data used for the book are described, as are the ways in which such

key elements as subjective distress, attachment, self-esteem, and illness contacts were measured. To address the issue of comparability of the married samples, background characteristics of the suburban, reconciled, and marital transition samples are examined. Also, "risk factors" that have been thought predispose those who divorce are explored. Having laid the groundwork, subsequent chapters cover the processes of the relationship estrangement that occurs within marriage, and various "causes" of divorce including legal definitions, psychological correlates, and marital complaints. The effect of divorce on physical and mental health and the implications of age and other life events on the ability to adjust are described. Parents' initial perceptions of the impact of divorce on their children are reported, as are changes in their perceptions over time. Other topics include economic factors, social support systems, and life after divorce. Finally, analyses are presented that illustrate what factors are associated with better and worse adjustment to divorce for blacks and whites, and men and women, both cross-sectionally and longitudinally. Adding immeasurably to our understanding about the causes and consequences of divorce, this volume will be valued by clinicians who work with the divorced, community psychologists, child and family development scholars, and sociologists interested in family and health. Well written and clearly organized, it also serves as a classroom text for students in these fields.

Divorce and Remarriage Among Muslims in India Jan 02 2020 Divorce is usually studied in terms of two distinct perspectives. One focuses on the procedure laid down for giving the seal of final authority to a divorce. The other explores the processes that are set in motion once the stability of a marriage is threatened. The latter perspective does not see divorce in isolation but treats it in the wider context of social structure. When divorce in Muslim communities is discussed, the tendency quite often is to place theology and law at the centre. This book recognizes that divorce in Muslim communities entails substantial theological and legal dimensions, but takes as its point of departure the view that it is only by placing divorce in the social and cultural context that meaningful conclusions can be arrived at. It examines, in the light of empirical evidence, the incidence of divorce and separation, the social and other causes due to which divorce and separation takes place, and the position of divorced women in society as well as their prospects of remarriage. In the process substantial methodological and theoretical questions relevant to the study of divorce as a social phenomenon are raised. The book has an immediate practical aim as well. Muslim law of divorce, particularly the provision of triple divorce, which vests a unilateral right in the husband to pronounce a summary divorce upon his wife, has been the subject of considerable controversy. Essentially, the papers brought together in this book are sociological analyses of divorce and remarriage among Muslims in India and the data thrown up as part of these analyses should clear some points in the controversy.

The Divorce of Lothar II May 06 2020 "She declares, so the bishops will write in their report on the

council, that she is unworthy to continue as a married woman. 'Before God and his angels' she bares her heart and confesses to them 'every secret relating to the rumor that had arisen.' The 'rumor'--as will become apparent--concerns her sexual relations with her brother. True, the 'inner wound' which she 'confesses' to God and the bishops was not dealt her of her own volition but under duress, but it is in any event so terrible that she no longer feels herself worthy to share a royal or a marital bed or to marry anyone at all. The bishops and abbots allow her, as she had supposedly requested, to enter a convent."--from *The Divorce of Lothar II* *The Divorce of Lothar II* illuminates the origin and development of Western notions of marriage and divorce and the separation of church and state in the context of a notorious royal divorce in late Carolingian Europe. In 857, Lothar II, king of Lotharingia, decided to divorce Theutberga--either because she had allegedly engaged in an incestuous liaison with her brother or simply because Lothar had wished to marry his concubine Waldrada. Karl Heidecker's dramatic and engaging narrative untangles the chaos that resulted: two popes, a host of often quarreling bishops, and Lothar's conniving uncles soon became involved in an epic struggle that did not end even with the death of Lothar. The extraordinary series of events sheds light on the fact that the laws on marriage and divorce were still uncertain. The Church itself was hardly unified in its approach, and its efforts to formulate and impose rules repeatedly foundered against the political machinations characteristic of the Carolingian world. In *The Divorce of Lothar II*, Heidecker not only discusses the legal aspects of the case but also pays much attention to the often heavy-handed ways in which the players of the story achieved their goals. This ninth-century scandal becomes a study of family dynamics, changing values, and the tenuous relationships between kings, nobles, and bishops around the topic of royal marriage. Though the drama ended with no clear resolution of the Church's position, Lothar's quest is revealed as an early chapter in the emergence of the belief that marriage rests on the personal will of the partners, is monogamous, and should not be dissolved.

Divorce in China Nov 23 2021 Why are women still at a disadvantage in Chinese divorce courts? Despite the increase of gender consciousness in Chinese society and a trove of legislation to protect women, why are Chinese women still disadvantaged in divorce courts? Xin He argues that institutional constraints to which judges are subject, a factor largely ignored by existing literature, play a crucial role. Twisting the divorce law practices are the bureaucratic incentives of courts and their political concerns for social stability. Because of these concerns, judges often choose the most efficient, and safest, way to handle issues in divorce cases. In so doing, they allow the forces of inequality in social, economic, cultural, and political areas to infiltrate their decisions. Divorce requests are delayed; domestic violence is trivialized; and women's child custody is sacrificed. The institutional failure to enforce the laws has become a major obstacle to gender justice. Divorce in China is the only study of Chinese divorce cases based on fieldwork and interviews conducted inside Chinese courtrooms over the course of a decade. With an unusual vantage point, Xin He offers a rare and unfiltered view of the operation of Chinese courts in the authoritarian regime. Through a socio-legal perspective highlighting the richness, sophistication, and cutting-edge nature of the research, Divorce in China is as much an account of Chinese courts in action as a social ethnography of China in the midst of momentous social change.

Divorce in Psychosocial Perspective Oct 03 2022 Many books deal with divorce and its aftermath -- some deal with the impact of divorce on children and families, others with the legal or sociological aspects of divorce, and a few focus on divorced mothers and fathers. Most of these books are characterized by their practical orientation toward the issues and problems posed by divorce. None of these, however, have attempted to offer an integrated view of the massive amount of theoretical and research literature on divorced adults and their children. In addition, none present a comprehensive view of divorce as a psychological process within its larger social context. Filling that void, this book: * offers a comprehensive view of divorce as a social, interpersonal and psychological phenomenon, * reviews the theory and research on divorce focusing on the major protagonists of the divorce drama: the mother, the father and the children, and * introduces a social-psychological theory of divorce process.

Marriage and Divorce in Islamic South-East Asia Mar 16 2021 This is the first comprehensive study of trends in marriage and divorce in the world's largest Islamic population, that of South-East Asia, covering Indonesia, Malaysia, Singapore, Brunei, Southern Thailand, and parts of the Philippines. The study draws together elusive data to provide a comprehensive picture of time trends and of differentials in marriage and divorce within this region. These trends are distinctive: since the 1950s, age at marriage for females has risen sharply, age differences between spouses have narrowed, and divorce rates have fallen markedly from very high levels to levels well below those in Western countries. The study sets these trends within the context of the pre-Islamic situation in the region, the effects of the coming of Islam, and more recent political, social, economic, and legal changes which have influenced the family and marriage patterns. The study draws heavily on historical and ethnographic sources, as well as the author's own fieldwork and extensive experience within the region. The result is a fascinating account of changes in marriage and divorce patterns in a region experiencing rapid economic and social development.

Children of Divorce Apr 28 2022 Featuring excerpts of essays collected from over one thousand young adults while in the throes of divorce, this book paints a picture of the pain and the hope shown by the storytellers. By framing the narratives with an analysis of the most recent divorce literature, the authors provide readers with a greater and more vivid understanding of the effects of divorce. Challenging the contention that most children will be irretrievably hurt by their parents' divorce, some stories clearly demonstrate the strength and resilience many have learned in dealing with a divorce in the family. Emphasis is placed on how hope about the possibilities of having close relationships - as well as a willingness to create stronger families in their own lives - represent abiding motivations in this sample of young people. The authors hope that the use of the raw input of respondents will make the experiences more realistic and ultimately help people deal with major loss events in their lives. Highlights of the new edition include: A new chapter (7) that demonstrates the messiness of divorce (infidelity, dysfunctional interactions, multiple marriages/relationships, and the financial expense), the fading stigma of divorce, the latest divorce rates, the increased average age of first time marriages, and the recent hook-up phenomenon wherein young people are showing a reluctance to commitment Updated throughout with the most current demographic data, new findings from the top researchers in the field, and the latest intervention programs A review of the Divorce Variability and Fluidity Model (DVFM) that helps predict variability in adjusting to divorce More suggestions to help children adapt to divorce, including material on parenting education classes and mediation as a method for easing the process A list of readings and suggested websites for further review More tables and graphs to summarize key concepts. An ideal supplement for courses on divorce, family studies, close relationships, and loss and trauma taught in human development and family studies, and clinical, counseling, and social psychology, as well as communication, social work, and sociology, these engaging stories also appeal to practitioners and those interested in the effects of divorce in general.

Parental Life Courses After Separation and Divorce in Europe Nov 11 2020 This open access book assembles landmark studies on divorce and separation in European countries, and how this affects the life of parents and children. It focuses on four major areas of post-separation lives, namely (1) economic conditions, (2) parent-child relationships, (3) parent and child well-being, and (4) health. Through studies from several European countries, the book showcases how legal regulations and social policies influence parental and child well-being after divorce and separation. It also illustrates how social policies are interwoven with the normative fabric of a country. For example, it is shown that father-child contact after separation is more intense in those countries which have adopted policies that encourage shared parenting. Correspondingly, countries that have adopted these regulations are at the forefront of more egalitarian gender role attitudes. Apart from a strong emphasis on the legal and social policy context, the studies in this volume adopt a longitudinal perspective and situate post-separation behaviour and well-being in the life course. The longitudinal perspective opens up new avenues for research to understand how behaviour and conditions prior or at divorce and separation affect later behaviour and well-being. As such this book is of special appeal to scholars of family research as well as to anyone interested in the role of divorce and separation in Europe in the 21st century

Divorcing Divorce Oct 11 2020 IT'S TIME TO DIVORCE DIVORCE AND GIVE MARRIAGE ITS DUE HONOUR. The entire subject of divorce and re-marriage is a complex and emotionally charged issue. It is one of the most vexing problems the church faces in these modern days. Roughly one in four marriages (including those of Christians) ends in divorce. In Western culture, many people have a low view of marriage, approaching it casually with a take-it-or-leave-it attitude, rather than the reverence that Scripture gives it: "Let marriage be held in honor among all" (Heb. 13:4a). Marriage should not be entered into lightly. It is not a game. It is a serious covenant relationship. The problem is, most people these days are not prepared for marriage. They have not been educated as to the seriousness of marriage or its responsibilities. When it turns out not to be like the fairy tale that Hollywood has forced them, they cast it aside with no regard for it or its sanctity. Once again, Timothy Klaver leads the reader by the hand, allowing them to see with their own eyes what the Bible has to say on this life-altering issue.

Muslim Divorce in the Middle East May 18 2021 How have Muslim marriages legally ended around the turn of the 21st century? Who has the power to initiate and resist shari'a derived divorce? When are husbands and wives made to bear the costs of their marital breakdown? What does divorce law indicate about the development of gender regimes in the Middle East and North Africa? This book opens with a description of the historical development of Islamic divorce in the MENA. Subsequent chapters follow a Syrian male judge, a Moroccan female legal advice worker and a Libyan female judge as they deal with divorce cases in which husbands, wives, their relatives and lawyers debate gender roles in contemporary Muslim marriages. MENA 'state feminism' has increasingly equalized men's and women's access to divorce and encouraged discussions about how spouses should treat each other in marriage. The real life outcomes of these reforms have often been surprising. Moreover, as the last chapter explores, jihadi proto-states (such as Islamic State) have violently rejected state feminist divorce law reform. This accessible book will appeal to students, researchers and a general readership interested in Islamic law; Middle Eastern studies; gender and sexuality; and, legal and social anthropology.

The Law and Economics of Marriage and Divorce Apr 04 2020 What sort of contract is marriage? What does it offer the parties? What are the difficulties of enforcement, and the result of failed effective enforcement? This book takes an economic approach to marriage and divorce, considering the key role of 'incentives' in family law: it highlights the possible adverse consequences emanating from faulty legal design, while demonstrating that good family law should provide incentives for consistent and honest behavior. Economists, specialists in the economic analysis of law, and academic lawyers discuss recent advances in specialist work on marriage, cohabitation, and divorce. Chapters are grouped around four topics: the contractual perspectives on marriage commitment; the regulatory framework surrounding divorce; bargaining and commitment issues relating to marriage and near-marriage arrangements; and finally empirical work, which focuses on the impact of more liberal divorce laws. This important new study will be of considerable interest to lawyers, policy-makers and economists concerned with family law.

[A Common Sense, Practical Guide to Divorce in New York](#) Jun 30 2022 The simple message of this book is that divorcing husbands and wives should not allow divorce lawyers to send them off on a fool's errand that will take what is already a tragedy in their lives and turn it into a nightmare. That is when they are persuaded to employ the law as a weapon in a legal tug of war the object of which is simply to get as much as you can and to give as little as you have to. Rather, they should look to the law as a common framework that they can turn to in their effort to conclude an agreement and thereby get on with their lives. There is a name for this. It is called divorce mediation and it doesn't take forever or cost a king's ransom.
