Sorry, Wrong Answer Aug 29 2019 Where were Venetian blinds invented? What color is the black box on a commercial airplane? Where did India ink originate? * Most of us know more than we think we know. We also think we know more than we actually do-because some of what we think we know simply "ain't so." We all harbor misconceptions that are accepted not only because they are popular but also because they make sense. It makes sense to believe, for

example, that German chocolate originated in Germany rather than the truth: that German chocolate is so named because it was created by Sam German. It seems logical to believe that Mercury is the hottest planet because of its proximity to the sun, or that buttermilk contains butter, that Danish pastry is from Denmark, and that the boat race America's Cup was named after the United States of America. Questions Are the Answer Jan 07 2023 2018 Nautilus Book Awards Silver Winner What if you could unlock a better answer to your most vexing problem—in your workplace, community, or home life—just by changing the question? Talk to creative problem-solvers and they will often tell you, the key to their success is asking a different question. Take Debbie Sterling, the social entrepreneur who created GoldieBlox. The idea came when a friend complained about too few women in engineering and Sterling wondered aloud: "why are all the great building toys made for boys?" Or consider Nobel laureate Richard Thaler, who asked: "would it change economic theory if we stopped pretending people were rational?" Or listen to Jeff Bezos whose relentless approach to problem solving has fueled Amazon's exponential growth: "Getting the right question is key to getting the right answer." Great questions like these have a catalytic quality—that is, they dissolve barriers to creative thinking and channel the pursuit of solutions into new, accelerated pathways. Often, the moment they are voiced, they have the paradoxical

effect of being utterly surprising yet instantly obvious. For innovation and leadership guru Hal Gregersen, the power of questions has always been clear—but it took some years for the follow-on question to hit him: If so much depends on fresh questions, shouldn't we know more about how to arrive at them? That sent him on a research quest ultimately including over two hundred interviews with creative thinkers. Questions Are the Answer delivers the insights Gregersen gained about the conditions that give rise to catalytic questions—and breakthrough insights—and how anyone can create them.
