Dealing with a Rising Power Mar 06 2020 Download PDF for free from: <http://martenscentre.eu/publications/dealing-rising-power-turkeys-transformation-and-its-implications-eu-turkey>'s growing assertiveness on the international stage, difficulties with EU accession, rapidly rising economy, and the long and controversial reign of the Justice and Development Party (AKP) are all necessitating a need for analysis. The present study of the Centre for European Studies presents two papers which look at Turkey and the AKP from different perspectives. Svante Cornell's paper argues that AKP has moved away from democratic reforms and that Turkey's 'zero problems with the neighbours' approach to international relations has failed. Gerald Knaus maintains that the AKP and the EU's influence on Turkey have effected radical changes in the balance of power between the military and civilian actors, thus bringing Turkey somewhat closer to Western democratic standards. Both authors advocate continued EU engagement with Turkey, irrespective of the progress of accession negotiations.

The Europeanization of Turkey Jan 16 2021 Given the recent inertia in EU-Turkey relations in the midst of regional economic and political upheavals, Europeanization of Turkey takes a step back from the latest headlines to provide a comprehensive stocktaking of EU-inspired reform efforts in Turkey with an eye to understanding how effective or ineffective EU conditionality has been in making Turkey's key political institutions, actors and culture more compatible with European norms. In addition to contributing to the theoretical literature on the differential effects of Europeanization on the domestic realm, this volume also expands the existing scope of research to include questions of how socialization through the accession process operates under high levels of uncertainty about the attainability of European Union membership. Applying a uniform analytical framework and the methodology of process tracing, the authors in this volume assess the nature and degree of change that has occurred in various dimensions of Turkish domestic polity and politics in the context of Turkey's post-1999 EU accession. Engaging with important practical issues such as whether potential membership in the EU has brought about positive change, in which areas this change is manifest, and how significant this change has been, this book is an essential resource for students, scholars and researchers seeking to understand contemporary relations between the EU and Turkey.

Reflections On International Relations & Politics & History & Law Feb 03 2020 Does social science matter? Yes. Why does social science matter? It provides humans with knowledge, in form of research and theory, that allows us to understand our surroundings and how the social realm works. In addition to the theoretical and empirical understanding of the social realm, social science allows us to anticipate and shape aspects of future social developments and outcomes – e.g., demography and human security and social unrests; or actions and potential reactions between and among individuals, state-actors and non-state actors and their implication on the social realm. Thus, social science matters due to its canon of knowledge which empowers humans with tools to not just understand the social realm but also mediate in social dynamics and suggest policy reforms. Humans keen on the social science develop practical skills, distinctly valued in all forms of social dynamics. For instance, individuals can understand their social surroundings, assess decisions they attempt to make and such which political leadership conducts on their behalf. Without our knowledge in social science our understanding of the social realm is less complete and our objectivity is less robust. This book provides a platform for readers, scholars, and for practitioners to learn about present trends and debates in Social Sciences, and conduct creative and fresh (interdisciplinary) research; to discuss common encounters, and brainstorm innovative solutions. This book includes Twelve chapters which are divided into four sections related to the disciplines of International Relations, Politics, History, and Law. The chapters are written with different depth and quality; they demonstrate the validity which the social science can stimulate our understanding and anticipation of our world.

The Political Economy of Regulation in Turkey Jan 04 2020 The Political Economy of Regulation in Turkey brings together leading international scholars and experts on Turkey and regulatory reform to provide essential information on the recent Turkish experience and its relation to competition policy. After the 1980 liberalization reform, Turkey tried to introduce competition in many industries, but network industries have remained as monopolies. At the end of the 1990s, regulatory reform was initiated and independent regulatory agencies have been established by the government. Comprehensive discussions of these network industries, in particular airlines, electricity, natural gas, telecommunications and environment regulations, are offered. The contributors inquire how economic theory and historical analyses can enlighten the character of market processes and the role for government action in these industries, and the contributions shed light on the very recent changes in the regulatory structure and important legal cases that shape the future of regulated industries. This book discusses these issues in an international perspective and relates the Turkish experience to other similar countries, such as in Eastern Europe and Central America. This book serves as a useful guide to those who want to understand major changes in Turkey and regulatory reforms in other emerging markets, making it of interest to researchers and PhD students concerned with regulatory economics, the Turkish economy, and economic policy in emerging markets.

Development Discourses May 20 2021 This Collection Of Essays Seeks To Explore Common Lessons From Political Sociology And Development Studies And In This Process Tries To Resolve The Tension Between The Author S Academic And Practitioner Worldviews. The Author Has Tried To Highlight One Principal Concern In This Volume That Development Is More Often Than Not A Multicultural Construct Of Everyday Politics That Is Context-Bound And Predicated By Statements Of Informed Choices On The Part Of The Stakeholders And/Or Beneficiaries Involved. So Development Is More About Who Gets What, When, How, Where And Why In Terms Of An Authoritative Allocation Of Values That Is Underpinned By Definitions Of Stakeholders Or Beneficiaries Or Affected Persons. Such Definitions Are Power Statements That Are Scripted By Agencies That Generally Tend To View Development As An Unevenness That May Be Restructured In Terms Of Human And Physical Engineering As A Level Playing Ground Where Players Are Equipped With Uniform Access To Resources And Similar Opportunities. This Is, However, A Contentious Issue Without Any Simple Answers. Such An Interventionist Approach May Not Always Be Sponsored By The Mode Of Production Or The Marketplace Of Politics That By Definition Thrives On Discrepancies And Discriminations Among Unequally Affected Persons. The Present Work Will Be Of Interest To Political Sociologists, Economic And Social Historians, Development Consultants, Non-Profit Professionals, Social Workers, Grassroots Activists, Urban Planners, Academics As Well As Researchers Working In The Development Sector.

Rohingya Refugee Crisis in Myanmar Jul 22 2021 This book discusses the current reality and the future of ethnic Rohingyas in Myanmar. It presents Myanmar ' s history, policy, politics and, most importantly, while focusing on Rohingya ethnic conflict, presents a resolution by looking at the global and regional policies and politics of South Asia and South-East Asia. The recent coup unfolded in Myanmar and the detention of the democratic leaders has surprised the world with its subsequent emergency declaration in 2021, thus making this book relevant and well-timed.

Eventually, the book offers an account of a previously little known, yet much-discussed role of media, international actors, human trafficking, and humanitarian-based resolution for Rohingya refugee crisis. It shows a new perspective in the post-Rohingya influx era of Bangladesh and the neighbouring countries.

Parameterized Complexity in the Polynomial Hierarchy Jun 20 2021 Parameterized Complexity in the Polynomial Hierarchy was co-recipient of the E.W. Beth Dissertation Prize 2017 for outstanding dissertations in the fields of logic, language, and information. This work extends the theory of parameterized complexity to higher levels of the Polynomial Hierarchy (PH). For problems at higher levels of the PH, a promising solving approach is to develop fixed-parameter tractable reductions to SAT, and to subsequently use a SAT solving algorithm to solve the problem. In this dissertation, a theoretical toolbox is developed that can be used to classify in which cases this is possible. The use of this toolbox is illustrated by applying it to analyze a wide range of problems from various areas of computer science and artificial intelligence.

Just Living Jul 02 2022 As America has become more pluralistic, Protestantism, with its long roots in American history and culture, has hardly remained static. This finely crafted portrait of a remarkably complex group of Christian denominations describes Protestantism's history, constituent subgroups and their activities, and the way in which its dialectic with American culture has shaped such facets of the wider society as healthcare, welfare, labor relations, gender roles, and political discourse. Part I provides an introduction to the religion's essential beliefs, a brief history, and a taxonomy of its primary American varieties. Part II shows the diversity of the tradition with vivid accounts of life and worship in a variety of mainline and evangelical churches. Part III explores the vexed relationship Protestantism maintains with critical social issues, including homosexuality, feminism, and social justice. The appendices include biographical sketches of notable Protestant leaders, a chronology, a glossary, and an annotated list of resources for further study.
