*Design Computing and Cognition '08* Nov 29 2022 The importance of research and education in design continues to grow. For example, government agencies are gradually increasing funding of design research, and increasing numbers of engineering schools are revising their

curricula to emphasize design. This is because of an increasing realization that design is part of the wealth creation of a nation and needs to be better understood and taught. The continuing globalization of industry and trade has required nations to re-examine where their core contributions lie if not in production efficiency. Design is a precursor to manufacturing for physical objects and is the precursor to implementation for virtual objects. At the same time, the need for sustainable development is requiring design of new products and processes, and feeding a movement towards design - novations and inventions. There are now three sources for design research: design computing, design cognition and human-centered information technology. The foundations for much of design computing remains artificial intelligence with its focus on ways of representation and on processes that support simulation and generation. Artificial intelligence continues to provide an environmentally rich paradigm within which design research based on computational constructions can be carried out. Design cognition is founded on concepts from cognitive science, an even newer area than artificial intelligence. It provides tools and methods to study human designers in both laboratory and practice settings.

**Fandom: A Maxine Kordell Novel** Sep 15 2021 Maxine Kordell—former serial killer and passionate conservative—learns of sexual abuse in the football program at CSU, a Virginia university. Max—whose fiancé was killed by a pedophile—investigates, then draws the ire of alumni, students, administrators, and coaches, several of whom make the mistake of trying to intimidate her. Witnessing such unreasoning fandom first hand, Max begins questioning her own partisanship. Joined by Mena Harling, they find a cover-up involving head football coach Josh Dadier, affectionately known as JoDad. After CSU's President is murdered, then Dadier, an assistant coach, and the athletic director suddenly die, it's clear something even more sinister is happening at CSU. At the same time, Max is approached by the RNC as a possible GOP candidate for one of Virginia's U.S. Senate seats. But when she attempts to investigate CSU further, she's asked to stop by a White House political strategist, then aided by White House liaison Julie Hartz, who, unknown to Max, is The Tracer, and has her own

agenda for ending the pedophilia. Probing further, Max discovers an international ring of sexual abusers, The Unity, and a criminal gang called GAG. Aided by Mena, Willi Mayers, and Haley, she begins rooting them out. But The Unity has loyalists everywhere—university campuses, Hollywood studios, the Olympics, religious organizations, and the U.S. Congress. And GAG fears Max will expose their activities, also making her a target. Meanwhile, BURN, a group that eliminates up and coming conservatives, had earlier decided Max should be watched, and assigned an assassin to court her. But BURN's leader, The Rector, has a personal reason for wanting Max dead. In confrontations in Los Angeles, on a private Caribbean island, and in Virginia, Max and her friends must face the assassins Cike, Logistique, Cum Sicario Disputabo, and Ubiytsa. As they do, Max must come to grips with truths that threaten her already shaky worldview. Later, when matters seem settled, Max learns a Pennsylvania Catholic bishop has covered up sexual abuse for years, and a close friend was victimized. So Max decides to make a frightening bloody statement, then meets with Pope John Paul II, to learn to what extent he will address Church sexual abuse in the future. As endgames play out, and her core beliefs are challenged, Max, in a Catholic cemetery, at the gravesites of her fiancé and high school friend, must decide who and what she truly is.
