**The 30th SIAR International Congress of  
Automotive and Transport Engineering** Feb  
03 2020 This proceedings book includes papers  
that cover the latest developments in automotive  
vehicles and environment, advanced transport  
systems and road traffic, heavy and special  
vehicles, new materials, manufacturing  
technologies and logistics and advanced  
engineering methods. Authors of the papers  
selected for this book are experts from research,  
industry and universities, coming from different  
countries. The overall objectives of the  
presentations are to respond to the major  
challenges faced by the automotive industry, and  
to propose potential solutions to problems  
related to automotive technology, transportation  
and environment, and road safety. The congress  
is organized by SIAR (Society of Automotive  
Engineers from Romania) in cooperation with  
SAE International. The purpose is to gather

members from academia, industry and government and present their possibilities for investigations and research, in order to establish new future collaborations in the automotive engineering and transport domain. This proceedings book is just a part of the outcomes of the congress. The results presented in this proceedings book benefit researchers from academia and research institutes, industry specialists, Ph.D. students and students in Automotive and Transport Engineering programs.

**Bentley Six-Cylinder Models In Detail** May

08 2020 WO Bentley had launched his first model, the four-cylinder 3 Litre, in 1921, as a sporting car for the discerning driver, intending that it should provide 80mph performance, with exceptional reliability founded on the quality of its engineering and construction. All cars even came with a five-year guarantee. It quickly became the favourite of wealthy young sportsmen and, to prove a point, 3-litres won at

Le Mans in 1924 and 1927. In 1925 the company launched WO's latest creation, the six-cylinder 6 1/2-litre, intended as a fast luxury car to rival the Rolls-Royce Phantom and to steal a part of its market. This was a car of quite different character from the 3-litre, and well suited to elegant enclosed coachwork. It was joined in 1928 by the Speed Six version, which derived its extra performance from having twin carburettors and a higher compression ratio. In the steady hands of Woolf Barnato, Bentley's principal financial backer, Speed Sixes won at Le Mans in 1929 and 1930. Next, in 1931, came WO's true supercar, the 8-litre. Enormous, strikingly handsome, fabulously expensive and capable of 100mph in any form, it is one of motoring's immortals, but by now the company was in trouble, and the 4-litre which was hastily introduced to revive its bank balance sadly failed to do so. As a background to these events, the author opens with an account of the company's performance, and its problems, during the later

years of the 1920s. Then comes a detailed examination and analysis of the 6 1/2-litre – its engine, transmission, chassis and running gear – with extracts from contemporary reports and road tests, and information on production changes and modifications. This is followed by equivalent coverage of the Speed Six, 8-litre and 4-litre models. The author describes the Speed Six's illustrious competition history, and reviews the range of bodies offered by coachbuilders, from open tourers to stately limousines, for the six-cylinder cars. Outstanding examples of all models have been photographed specially for this book and are featured in detail in some 150 colour shots. There are also more than 150 black-and-white photographs drawn from archive sources. Offering an in-depth examination of these splendid, charismatic Bentleys, this book provides an unrivalled store of knowledge for the many who care passionately about them, and serves as a tribute to the men who made them.
