Regulating Corporate Bribery in International Business Jul 20 2021 This book is about the regulation of corporations that use bribery in international commerce to win or maintain overseas business contracts and interests. Recent large-scale cases involving multinational corporations demonstrate how large commercial 'non-criminal' enterprises are being implicated in substantive overseas bribery scandals and illustrate the difficulties faced by responsible enforcement authorities in the UK and Germany. The book imports concepts from regulation theory to aid our understanding of the emerging enforcement, self-regulatory and hybrid responses to transnational corporate bribery. Lord implements a qualitative, comparative research strategy involving semi-structured interviews, participant observation and document analysis to provide empirical insights into this relatively invisible area of criminological interest. Despite significant cultural differences between the jurisdictions, this book argues that UK and German anti-corruption authorities face procedural, evidential, legal, financial and structural difficulties that are leading to convergence in prosecution policies. Although self-regulatory and hybrid mechanisms are aiding the response and gaining some level of regulation, the default position is one of accommodation by state agencies, even where the will to enforce the law is high. This book is essential reading for academics and students researching corporate and white-collar crimes and the concept of regulation more generally, as well as law enforcement agencies and international and intergovernmental organisations concerned with anti-corruption.

Security and Global Governmentality Jan 14 2021 This book examines global governance through Foucaultian notions of governmentality and security, as well as the complex intersections between the two. The volume explores how Foucault's understanding of the general economy of power in modern society allows us to consider the connection of two broad possible dynamics: the global governmentalization of security and the securitization of global governance. If Foucault's work on governmentality and security has found resonance in IR scholarship in recent years it is in large part due to his understanding of how these forms of power must necessarily take into account the management of circulation that, in seeking to maximize 'good' versus 'bad' circulatory flows, brings into play and problematizes the 'inside'/outside' upon which domestic and international spaces have been traditionally understood. Indeed, Foucault introduces a set of conceptual tools that can inform our analyses of globalization, global governance and security in ways that have been left largely unexplored in the discipline of IR. Miguel de Larrinaga is Assistant Professor at the University of Ottawa where he has been teaching since 2002. Marc G. Doucet is an Associate Professor in the Department of Political Science at Saint Mary's University.

More Than You Wanted to Know Apr 04 2020 How mandated disclosure took over the regulatory landscape—and why it failed Perhaps no kind of regulation is more common or less useful than mandated disclosure—requiring one party to a transaction to give the other information. It is the iTunes terms you assent to, the doctor's consent form you sign, the pile of papers you get with your mortgage. Reading the terms, the form, and the papers is supposed to equip you to choose your purchase, your treatment, and your loan well. More Than You Wanted to Know surveys the evidence and finds that mandated disclosure rarely works. But how could it? Who reads these disclosures? Who understands them? Who uses them to make better choices? Omri Ben-Shahar and Carl Schneider put the regulatory problem in human terms. Most people find disclosures complex, obscure, and dull. Most people make choices by stripping information away, not layering it on. Most people find they can safely ignore most disclosures and that they lack the literacy to analyze them anyway. And so many disclosures are mandated that nobody could heed them all. Nor can all this be changed by simpler forms in plainer English, since complex things cannot be made simple by better writing. Furthermore, disclosure is a lawmakers' panacea, so they keep issuing new mandates and expanding old ones, often instead of taking on the hard work of writing regulations with bite. Timely and provocative, More Than You Wanted to Know takes on the form of regulation we encounter daily and asks why we must encounter it at all.

The Organic Grain Grower Apr 28 2022 The Organic Grain Grower is an invaluable resource for both home-scale and commercial producers interested in expanding their resiliency and crop diversity through growing their own grains. Longtime farmer and organic pioneer Jack Lazor covers how to grow and store wheat, barley, oats, corn, dry beans, soybeans, oilseeds, grasses, nutrient-dense forages, and lesser-known cereals. In addition, Lazor argues the importance of integrating grains on the organic farm (not to mention within the local food system) for reasons of biodiversity and whole-farm management. The Organic Grain Grower provides information on wide-ranging topics, from nutrient density and building soil fertility to machinery and grinding grains for livestock rations.--COVER.

The War on Drugs in Sport Mar 16 2021 This book is an innovative and compelling work that develops a modified moral panic model illustrated by the drugs in sport debate. Drawing on Max Weber's work on moral authority and legitimacy, McDermott argues that doping scandals create a crisis of legitimacy for sport governing bodies and other elite groups. This crisis leads to a moral panic, where the issue at stake for elite groups is perceptions of their organizational legitimacy. The book highlights the role of the media as a site where claims to legitimacy are made, and contested, contributing to the social construction of a moral panic. The book explores the way regulatory responses, in this case anti-doping policies in sport, reflect the interests of elite groups and the impact of those responses on individuals, or "folk devils." The War on Drugs in Sport makes a key contribution to moral panic theory by adapting Goode and Ben-Yehuda's moral panic model to capture the diversity of interests and complex relationships between elite groups. The difference between this book and others in the field is its application of a new theoretical perspective, supported by well-researched empirical evidence.

The Routledge Handbook on Cities of the Global South Jun 26 2019 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism. This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting, the imperative for multiple genealogies of knowledge production, as well as a diversity of empirical entry points to understand contemporary urban dynamics. The Handbook works towards a geographical realignment in urban studies, bringing into conversation a wide array of cities across the global south - the 'ordinary', 'mega', 'global' and 'peripheral'. With interdisciplinary contributions from a range of leading international experts, it profiles an emergent and geographically diverse body of work. The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in, or of, the global south; arguments that are fluid and increasingly contested geographically and conceptually. It reflects on critical urbanism, the macro- and micro-scale forces that shape cities, including ideological, demographic and technological shifts, and constantly changing global and regional economic dynamics. Working with southern reference points, the chapters present themes in urban politics, identity and environment in ways that (re)frame our thinking about cities. The Handbook engages the twenty-first-century city through a 'southern urban' lens to stimulate scholarly, professional and activist engagements with the city.

International Marketing Compact Feb 01 2020 International Marketing Compact offers a new perspective in teaching international marketing. The authors address issues in a novel way by bringing in cases from advanced and emerging markets. In this connection they also discuss technological requirements of the 21st century and how these developments necessitate a change in looking at international marketing issues. The individual chapters follow the necessary steps to develop and implement projects successfully in the international market place. The knowledge, which is provided for both students and practitioners, is well balanced in terms of theoretical input and managerial application. This is the result of numerous examples presented in this book not only from Europe, but also from other markets throughout the world. The book is addressed to various student groups: those in a bachelor's program studying business, economics and international trade can well use the book to gain a broad and current perspective on trends in international marketing theory and practice. Those in a master's program for business, economics and international trade can use the book as a guide for building a theoretical background for their term projects and the case studies they analyze. Those at the PhD level in the same or similar disciplines can take a compact look at 21st century international marketing. It is also beneficial for international students, for example, for Erasmus students at European universities, who are building a common international marketing background and perspective that they can take back to their studies at their home universities.

Anti-Bribery Laws in Common Law Jurisdictions Oct 03 2022 Anti-Bribery Laws in Common Law Jurisdictions provides a comprehensive analysis of the foreign bribery laws and of related laws and regulations in key common law jurisdictions. This book extensively addresses the official guidance associated with the Foreign Corrupt Practices Act (FCPA) and the UK Bribery Act, and explains the related legal obligations that apply to record-keeping practices and maintaining adequate internal controls. Foreign bribery legislation in Australia, Canada, Ireland, New Zealand, and South Africa are also extensively addressed. Stuart H. Deming also closely focuses on laws that may expose an individual or entity to private or commercial bribery in foreign settings, as well as to the application of laws relating to money laundering, accounting, and record-keeping practices to situations involving foreign bribery. Throughout, special attention is given to explaining the criteria used in each jurisdiction to establish liability on the part of an entity or organization for foreign bribery.

Theories and Practices of Development Nov 11 2020 Global economic crisis and the implications of global environmental change have led academics and policy-makers to consider how 'development' in all parts of the world should be achieved. However, 'development' has always been a contested idea. While often presented as a positive process to improve people's lives, the potential negative dimensions of 'development' on people and environments must also be recognized. Theories and Practices of Development provides a clear and user-friendly introduction to the complex debates around how development has been understood and achieved. The second edition has been fully updated and expanded to reflect global political and economic shifts, as well as new approaches to development. The rise of China and India is given particular attention, as is the global economic crisis and its implications for development theories and practice. There are new sections on faith-based development, and the development dimensions of climate change, as well as greater engagement with development theories as they are put into practice in the Global North. The book deals with the evolution of development ideas and policies, focusing on economic, political, social, environmental and spatial dimensions. It highlights how development cannot be considered as a neutral concept, but is entwined with inequalities in power at local, as well as national and global scales. The use of boxed examples, tables and illustrations helps students understand complex theoretical ideas and also demonstrates how development theories are put into practice in the real world. Each chapter ends with a summary section, discussion topics, suggestions for further reading and website resources.

Gender, Governance and International Security Jul 08 2020 The United Nations Security Council, in 2000, unanimously passed a resolution calling for women's increased participation in conflict prevention and peacebuilding, as well as their protection during conflict. This marked the first time that the UN Security Council explicitly addressed gender issues in 'conflict' and 'post-conflict' situations. But what difference has this international agenda on 'Women, Peace and Security' made to women's lives on the ground and to the governance of international peace and security? This volume provides a critical evaluation of the mainstreaming of gender issues in matters of international peace and security resulting from the passage of Resolution 1325 in 2000. It considers how this agenda actually plays out in different contexts, and with what implications for women's activism and for peace and security. The picture that emerges is not uniform, obliging us to reconsider the links between gender, conflict, different visions of peace and, consequently, different projects of peacebuilding. Consequently, the book poses new questions for transnational feminist scholars and activists. This book was based on a special issue of the International Feminist Journal of Politics.

A Failure of Vision Feb 12 2021 Doug Greene takes an in-depth and critical look at the life and ideas of Michael Harrington, one of America's most important democratic socialists. A Failure of Vision discusses one of the most important champions for democratic socialism in the United States. Michael Harrington (1928-1989) is widely recognized for writing *The Other America*, a seminal expose of poverty in the United States that inspired the War on Poverty. He was also the founder of the Democratic Socialists of America (DSA), which is currently the largest socialist organization in the United States. Michael Harrington hoped to transform democratic socialism from a marginal view into a major political force in the United States. To accomplish this, he advocated that socialists act as the "left-wing of the possible" inside of the Democratic Party in order to transform it into one that truly represented the people. In the end, Realignment proved to be a dead end to advance socialist politics. The questions proposed by Michael Harrington continue to be sharply debated by socialists. With an engaging style and critical approach to Michael Harrington's shortcomings, this book is essential reading to understand contemporary debates on the American left.

Consumer Protection Law Developments Oct 23 2021

The Cambridge Handbook of Consumer Privacy Dec 25 2021 Businesses are rushing to collect personal data to fuel surging demand. Data

enthusiasts claim personal information that's obtained from the commercial internet, including mobile platforms, social networks, cloud computing, and connected devices, will unlock path-breaking innovation, including advanced data security. By contrast, regulators and activists contend that corporate data practices too often disempower consumers by creating privacy harms and related problems. As the Internet of Things matures and facial recognition, predictive analytics, big data, and wearable tracking grow in power, scale, and scope, a controversial ecosystem will exacerbate the acrimony over commercial data capture and analysis. The only productive way forward is to get a grip on the key problems right now and change the conversation. That's exactly what Jules Polonetsky, Omer Tene, and Evan Selinger do. They bring together diverse views from leading academics, business leaders, and policymakers to discuss the opportunities and challenges of the new data economy.

[International Harvester Tractors & Equipment ANZ](#) Aug 01 2022 This book comprehensively documents the International Harvester Company's activities from its inception to its merger with Case as Case IH and their influence in Australia and New Zealand. IHC began with a merger of harvesting machinery companies to form the International Trust, the world's biggest farm machinery enterprise at the time. Then IHC became involved with tractors to become the world's largest tractor and full-line machinery maker, setting production records that stand to this day.

[Red Tractors 1958-2018](#) Apr 16 2021 The second edition of the award-winning history of International Harvester and Case IH tractors includes data and photos of every model built from 1958 to 2013, as well as in-depth information about how these tractors were designed and constructed. With interviews of engineers and executives, the book covers how the 40 and 60 series were created, and thoroughly covers the red tractors from the 1960s through the 1980s. The book also traces the innovations and struggles of the final days of International Harvester. The authors unearthed a treasure trove of concept drawings and photos of prototype machines to shed new light on how these tractors were created. The book includes the exciting story of the creation of the Case-IH Magnum, an innovative machine that blends some of the great engineering done by IH with the Cummins engine built by Case. The modern era of Case IH is also included, with the story of the creation of the Quadtrac as well as the entire line of tractors. With a mix of new photography of some of the most exceptional collectible models in existence along with hundreds of previously unpublished photographs, this thorough book is the most authoritative guide on red tractors ever published.

[The Ruling Elite](#) Sep 29 2019 Lincoln's war, the North's attack on the South, took the life of 622,000 citizens and altered the government's structure. Marx and Engels watched the war from afar and applauded his efforts. The media and our government-controlled schools have presented a deceptive view of every historical event and have whitewashed the most scandalous political leaders and vilified leaders who have worked in the best interests of the people. Following Lincoln's precedent-setting war, we have been repeatedly lied into wars. Currently, our young men and women shed their blood in foreign lands while well-connected corporations make massive profits rebuilding the infrastructure that other corporations have demolished. Meanwhile, our politicians, possessing inside knowledge, grow richer through their investments and the bribes they accept from deep-pocketed lobbyists. They have not listened to their constituents for decades. CIA thugs, in behalf of the corporations, commit terrorist acts in other countries which the U.S. government and media blame on the so-called insurgents. In 2010, the Pentagon paid the following to the top five out of 100 (1) Lockheed Martin Corp. \$16,700,588,328; (2) Northrop Grumman Corp. \$11,145,533,497; (3) Boeing Co. \$10,462,626,196; (4) Raytheon Co. \$6,727,232,555; (5) Science Applications International Corp. \$5,474,482,583. Yet, throughout the country, vital infrastructure is crumbling and politicians are selling taxpayer-funded public properties to private interests as a profitable venture. The new owners exploit the public by raising service rates while diminishing the services.

[Global View on the World Economy](#) Oct 11 2020 As globalization continues apace, market segmentations are diminishing, distance is shrinking and the boundaries between nation states are becoming increasingly blurred. National economies are closely interlinked through many channels and we rarely view things from a single country's view, adopting a global perspective instead. It is therefore imperative to understand how the world economy functions. This book utilizes up to date empirical evidence to illuminate the mechanics of the world as a single entity. The author explores the properties of the world economy, the diverse mechanisms of interdependence, shocks and disturbances, economic processes and structures, and the institutional arrangements that guide these processes. Key topics covered include: world GDP, growth and global product and factor markets China as a new global player the roots and impact of financial and currency crises the performance of the developing countries over time (which have gained, which have lost?) conflicts between the national interest and global concerns (protectionism, locational competition for mobile factors of production, environmental issues) the institutional arrangements for the world economy (IMF, WTO). *The World Economy: A Global Analysis* will be essential reading for students studying the world economy from the perspective of economics, finance, business and politics.
