Gone Boy Aug 08 2020 On December 14, 1992, Gregory Gibson's eighteen-year-old son Galen was murdered, shot in the doorway of his college library by a fellow student gone berserk. The killer was jailed for life, but for Gibson the tragedy was still unfolding. The morning of the shooting, he learned, college officials had intercepted but not stopped a box of ammunition addressed to the murderer. They were also anonymously warned of the intended killing but failed to call the police. After years of frustrated attempts to find peace, Gibson woke one morning to a terrible vision of his own rage and helplessness. He knew he had to do something before he destroyed himself, and he resolved to discover and document the forces that led to Galen's death. *Gone Boy* follows Gibson as he visits the gun seller, as well as detectives, lawyers, psychiatrists, politicians, and college bureaucrats— a cast of characters as vivid as those in a Raymond Chandler mystery. Hailed by the New York Times and others for its evocative style and courage in confronting guns, violence, and manhood in America today, this wrenching memoir speaks in the voice of a man struggling to turn grief and rage into acceptance and understanding. From the Trade Paperback edition.

Mastering Canon EOS Flash Photography, 2nd Edition May 29 2022 In this updated, second edition of the authoritative, bestselling *Mastering*

Canon EOS Flash Photography, photographer NK Guy brings the book fully up to date, with coverage of all the newest Canon gear that has hit the market since the first edition published in 2010. This includes coverage of the radio-enabled Canon Speedlite 600EX-RT and Canon Speedlite Transmitter ST-E3-RT, as well as the other Speedlites that have been released since the first edition's publication: Canon Speedlite 90EX, 270EX II, 320EX, and 600EX. And this is the first book to cover Canon's new, affordable master unit—the Speedlite 430EX III-RT flash! Digital cameras and flash technology have truly revolutionized photography in the 21st century. Originally seen simply as a practical way to illuminate dark scenes with portable light, flash today is used for a host of creative and nuanced applications, including supplementing daylight, designing complex scenes lit by multiple light sources, and simply creating beautiful, controllable light for portraiture. With LCD screens on DSLRs, the ability to get instant feedback on lighting setups is a great help in advancing one's lighting capabilities and encouraging experimentation. However, flash photography can still be a difficult artistic and technical challenge. It's simple to get that harsh deer-in-the-headlights look from built-in automatic flash, but it is a far cry from beautiful light. Creating natural-looking images is not nearly as straightforward. Mastering the properties of light and the ability to manipulate, craft, and direct it is a lifelong endeavor. Those diving into Speedlights need some help. Manuals are terse and the terminology is confusing—this is where *Mastering Canon EOS Flash Photography* comes in. This is the complete book on the subject, guiding you through Canon's Speedlite system, from off-camera portable flash to professional studio lighting. It covers the fundamentals of flash metering technology, discusses key lighting concepts, and documents a wide range of Canon and third-party equipment. Universal flash accessories, studio gear, and radio triggers are all thoroughly covered. The book is lavishly illustrated with diagrams that demonstrate important functions and lighting arrangements, and inspiring photos that show sophisticated flash techniques. Though tailored for users of Canon EOS cameras, owners of other camera systems will find much valuable information as well. So, whether you're just getting started with flash, or you've picked up the bug for off-camera lighting from such popular websites as Strobist.com, or you're making the leap into advanced studio work, *Mastering Canon EOS Flash Photography* is your in-depth resource. Includes a foreword by David Hobby, noted photojournalist and founder of Strobist.com.

Nonhuman Photography Jun 29 2022 A new philosophy of photography that goes beyond humanist concepts to consider imaging practices from which the human is absent, as both subject and agent. Today, in the age of CCTV, drones, medical body scans, and satellite images, photography is increasingly decoupled from human agency and human vision. In *Nonhuman Photography*, Joanna Zylińska offers a new philosophy of photography, going beyond the human-centric view to consider imaging practices from which the human is absent. Zylińska argues further that even those images produced by humans, whether artists or amateurs, entail a nonhuman, mechanical element—that is, they involve the execution of technical and cultural algorithms that shape our image-making devices as well as our viewing practices. At the same time, she notes, photography is increasingly mobilized to document the precariousness of the human habitat and tasked with helping us imagine a better tomorrow. With its conjoined human-nonhuman agency and vision, Zylińska claims, photography functions as both a form of control and a life-shaping force. Zylińska explores the potential of photography for developing new modes of seeing and imagining, and presents images from her own photographic project, *Active Perceptual Systems*. She also examines the challenges posed by digitization to established notions of art, culture, and the media. In connecting biological extinction and technical obsolescence, and discussing the parallels between photography and fossilization, she proposes to understand photography as a light-induced process of fossilization across media and across time scales.

Canon EOS Rebel T8i/850D User Guide Jan 13 2021 The basic structure of the EOS Rebel T8i/850D camera is similar to that of its predecessor model EOS Rebel T6i. This camera has a 24 Megapixel APS-C sensor. The new generation sensor with a dual-chip can capture very good images in high-contrast conditions. Due to the presence of the Dual-Chip CMOS AF sensor, it is much faster and has a much larger coverage area. It is possible to make some good photos by using the Dual-Chip CMOS AF sensor. It helps in improved AF and AF-C performance as compared to the EOS Rebel T6i. Furthermore, the user can use this camera in low-light situations. In the photos captured in low light, it is possible to see a very bright bokeh effect. Also, it has better autofocus ability than the EOS Rebel T6i. The maximum ISO can be set up to 16000

and the range of ISO 100-32000. Its electronic shutter is faster than the EOS Rebel T6i. It has a new AF algorithm that makes it possible to track the subject with very little user effort. The camera can also shoot videos in 4K resolution at 30 frames per second. The previous model EOS Rebel T6i can shoot videos only in HD resolution. This camera features a Live View Finder, which can display what is in the viewfinder on the screen. The screen can be tilted up and down from the right side of the camera. The built-in pop-up flash can be attached to the camera to allow users to click portraits with no flash. The viewfinder and the rear LCD are always shown on the top plate and the sensitivity can be adjusted. This is the Manual you need to get started with using this camera seamlessly. This book covers all the features and settings for the Canon EOS Rebel T8i/850D Camera as you will get wider knowledge on topics such as: What's In It For Me With The Canon EOS Rebel T8i/850D Camera Getting To Know The External Buttons Setting Up Your Camera Information About The LCD Screen Using The Video Mode Information About The Black Screen Using Playback How To Use The Shooting Modes What Does The Creative Filter Do Controlling The Exposure A Look At The White Balance Modes For Metering How To Use Focus Modes Canon Rebel EOS T8i/850D Back Buttons Getting To Know The Deep Menu Setting Up Image Quality How To Use The Aspect Ratio Reviewing The Duration How To Release Shutter Without Card How To Correct Your Lens Aberration How To Control The Flash How To Use Exposure Compensation Setting Up ISO Speed How To Optimize Auto Lighting Using The White Balance Setting Up Color Space How To Setup Your Picture Style How To Reduce Long Exposure Noise How To Setup High ISO How To Delete Data Taking A Live View Shoot Using Anti-Flicker Shoot Using Lens Electronic MF Using The AF-assist Beam Information About The Change Rotate How To Erase Images Printing Order Setup For Photobook Using Creative Filters Correcting Red Eye How To Create An Album, Crop Images, And Resize Images How To Setup Image Search Using Image Jump Using The Histogram Using AF Point Display How To View From Last Seen Output For HDMI HDR Using The Purple Tab How To Select A Folder And many more..
