Creativity, Culture, and Development Nov 06 2022 This volume presents a collection of writings on the relations among creativity, culture and development. The editors invited “like-minded” researchers of creativity from around the world to share their respective notions of creativity. Given that human creativity is a potential that can and should be nurtured in the course of lifespan development and across all cultural backgrounds, the volume emphasizes the importance of promoting creativity in all cultures and through societal-educational opportunities, and offers a venue for the authors to make conceptual, empirical and practical inquiries into the relations among creativity, development and culture. The authors represent a varied “mix” of contemporary and emerging creativity researchers who use different methodologies to investigate the importance of culture in creativity development and the reciprocal role of developing creativity and cultural enrichment. The volume represents an attempt on the part of the editors and the authors to broaden our current understanding of creativity in the contexts of human and cultural development, and in so doing to enhance our understanding of creativity, culture and development in the contexts of flourishing human and societal activities. As the first volume in a book series on “Creativity in the Twenty-First Century”, the book invites readers and researchers to engage in future interdisciplinary and intercultural discourses and dialogues on the importance of creativity for human and cultural development.

Women in Thirteenth-century Lincolnshire Jan 04 2020 This book offers the first regional study of women in thirteenth-century England, making pioneering use of charters, chronicles, government records and some of the earliest manorial court rolls to examine the interaction of gender, status and life-cycle in shaping women's experiences in Lincolnshire. The author investigates the lives of noblewomen, gentlewomen, townswomen, peasant women, criminal women and women religious from a variety of angles. Not only does she consider how far women were partners alongside men, especially within the family, but she also explores whether they might have been both at once constrained and yet, to an extent, empowered by religious and biological ideas about gender difference which found expression in inheritance practices and the common law. Valuable light on the avenues for political influence open to elite women is shed through case studies of Nicholaa de la Haye (d. 1230), sheriff of Lincoln, Hawise de Quency (d. 1243), countess of Lincoln, and Margaret de Lacy (d. 1266), countess of Lincoln. The book also addresses women's roles within the rural and urban labour markets before the Black Death. LOUISE J. WILKINSON is Lecturer in History, Canterbury Christ Church University.
