Developing and Validating Test Items May 06 2020 Since test items are the building blocks of any test, learning how to develop and validate test items has always been critical to the teaching-learning process. As they grow in importance and use, testing programs increasingly supplement the use of selected-response (multiple-choice) items with constructed-response formats. This trend is expected to continue. As a result, a new item writing book is needed, one that provides comprehensive coverage of both types of items and of the validity theory underlying them. This book is an outgrowth of the author's previous book, *Developing and Validating Multiple-Choice Test Items*, 3e (Haladyna, 2004). That book achieved distinction as the leading source of guidance on creating and validating selected-response test items. Like its predecessor, the content of this new book is based on both an extensive review of the literature and on its author's long experience in the testing field. It is very timely in this era of burgeoning testing programs, especially when these items are delivered in a computer-based environment. Key features include ... Comprehensive and Flexible – No other book so thoroughly covers the field of test item development and its various applications. Focus on Validity – Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing, currently under revision by AERA, APA, and NCME Illustrative Examples – The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large numbers of items using algorithms and other item-generating methods are also presented. Based on Theory and Research – A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors.

Learn to Teach Nov 11 2020 Learn to Teach explores the most up-to-date findings on how children learn, to help teachers create effective learning environments and plan for teaching. Drawing on a neo-Vygotskian approach to learning, it covers the purpose of education; socio-cultural approaches to human cognition; attention and intelligence as cognitive tools; and the role of mindsets, memory and language in learning. It promotes the idea that the mind is a cultural product and that education is best understood as fostering the development of valued cognitive tools appropriate for the twenty-first century. To provide readers with a holistic understanding of learning, the book explores the significant contributions to the study of learning and teaching from psychologists, sociologists and cultural theorists. Readers are encouraged to critically engage with - and challenge - some of the prevailing learning theories in order to better understand their students. Each chapter features classroom observation exercises, discussion questions and links to further reading.

Teaching Psychology Aug 28 2019 This volume provides thoroughly updated guidelines for preparing and teaching an entire course in psychology. Based on best principles and effective psychological and pedagogical research, it offers practical suggestions for planning a course, choosing teaching methods, integrating technology appropriately and effectively, developing student evaluation instruments and programs, and ideas for evaluation of your own teaching effectiveness. While research-based, this book was developed to be a basic outline of "what to do" when you teach. It is intended as a self-help guide for relatively inexperienced psychology teachers, whether graduate students or new faculty, but also as a core reading assignment for those who train psychology instructors. Experienced faculty who wish to hone their teaching skills will find the book useful, too.

Reading, Writing, and Rigor Feb 01 2020 What does rigor, a word that frequently pops up in conversations about education, really mean? More specifically, what does it mean for literacy instruction, and how does it relate to challenging standards-based

assessments? In this informative and practical guide, literacy expert Nancy Boyles uses the framework from Webb's Depth of Knowledge (DOK) to answer these questions, offering experience-based advice along with specific examples of K-8 assessment items. Boyles defines rigor and shows how it relates to literacy at each DOK level and explains the kind of thinking students will be expected to demonstrate. She then tackles the essence of what teachers need to know about how DOK and its associated rigors are measured on standards-based assessments. Specifically, readers learn how each DOK rigor aligns with • standards, • text complexity, • close reading, • student interaction, • the reading-writing connection, and • formative assessment. Teachers, coaches, and administrators will find clear guidance, easy-to-implement strategies, dozens of useful teaching tools and resources, and encouragement to help students achieve and demonstrate true rigor in reading and writing.

**The Beats** Mar 04 2020 [This] survey of the many little magazines carrying the Beat message is impressive in its coverage, drawing attention to the importance of their paratextual content in providing valuable socio-political context. [...] The collection contains a range of insightful close readings, astute contextualizing, and inventive lateral pedagogical thinking, charting the transformation of the Beat scene from its free-wheeling, self-help, heady revolutionary 1960's days to its contemporary position as an increasingly respectable component of the curriculum. [...] The Beats: A Teaching Companion is successful on a number of levels; it is a noteworthy contribution to the ever expanding field of Beat studies and, more broadly, cultural studies; and it is a collection that at its best gives hope that in referring to its ideas the inspired teacher may still be able to enlarge the lives of their students.' John Shapcott, Keele University

*Introduction to Rubrics* Oct 30 2019 This new edition retains the appeal, clarity and practicality that made the first so successful, and continues to provide a fundamental introduction to the principles and purposes of rubrics, with guidance on how to construct them, use them to align course content to learning outcomes, and apply them in a wide variety of courses, and to all forms of assignment.

Reflecting developments since publication of the first edition, the authors have extended coverage to include: \* Expanded discussion on use of rubrics for grading \* Grading on-line with rubrics \* Wider coverage of rubric types (e.g., holistic, rating scales) \* Rubric construction in student affairs \* Pros and cons of working with "ready-made" rubrics \* Using rubrics to improve your teaching, and for SoTL \* Use of rubrics in program assessment (case study) \* Application of rubrics in the arts, for study abroad, service learning and students' independent learning \* Up-dated literature review

**The Critic as Amateur** Jun 06 2020 Can the criticism of literature and culture ever be completely professionalized? Does criticism retain an amateur impulse even after it evolves into a highly specialized discipline enshrined in the university? *The Critic as Amateur* brings leading and emerging scholars together to explore the role of amateurism in literary studies. While untrained reading has always been central to arenas beyond the academy – book clubs, libraries, used bookstores – its role in the making of professional criticism is often disavowed or dismissed. This volume, the first on the critic as amateur, restores the links between expertise, autodidactic learning and hobbyist pleasure by weaving literary criticism in and out of the university. Our contributors take criticism to the airwaves, through the culture of early cinema, the small press, the undergraduate classroom and extracurricular writing groups. Canonical critics are considered alongside feminist publishers and queer intellectuals. *The Critic as Amateur* is a vital book for readers invested in the disciplinary history of literary studies and the public role of the humanities. It is also a crucial resource for anyone interested in how literary criticism becomes a richly diverse yet shared discourse in the 20th and 21st centuries.

**Handbook of Automated Essay Evaluation** Dec 01 2019 This comprehensive, interdisciplinary handbook reviews the latest methods and technologies used in automated essay evaluation (AEE) methods and technologies. Highlights include the latest in the evaluation of performance-based writing assessments and recent advances in the teaching of writing, language testing, cognitive psychology, and computational linguistics. This greatly expanded follow-up to *Automated Essay Scoring* reflects the numerous advances that have taken place in the field since 2003 including automated essay scoring and diagnostic feedback. Each chapter features a common structure including an introduction and a conclusion. Ideas for diagnostic and evaluative feedback are sprinkled throughout the book. Highlights of the book's coverage include: The latest research on automated essay evaluation. Descriptions of the major scoring engines including the E-rater®, the Intelligent Essay Assessor, the Intellimetric™ Engine, c-rater™, and LightSIDE. Applications of the uses of the technology including a large scale system used in West Virginia. A systematic framework for evaluating research and technological results. Descriptions of AEE methods that can be replicated for languages other than English as seen in the example from China. Chapters from key researchers in the field. The book opens with an introduction to AEEs and a review of the "best practices" of teaching writing along with tips on the use of automated analysis in the classroom. Next the book highlights the capabilities and applications of several scoring engines including the E-rater®, the Intelligent Essay Assessor, the Intellimetric™ engine, c-rater™, and LightSIDE. Here readers will find an actual application of the use of an AEE in West Virginia, psychometric issues related to AEEs such as validity, reliability, and scaling, and the use of automated scoring to detect reader drift, grammatical errors, discourse coherence quality, and the impact of human rating on AEEs. A review of the cognitive foundations underlying methods used in AEE is also provided. The book concludes with a comparison of the various AEE systems and speculation about the future of the field in light of current educational policy. Ideal for educators, professionals, curriculum specialists, and administrators responsible for developing writing programs or distance learning curricula, those who teach using AEE technologies, policy makers, and researchers in education, writing, psychometrics, cognitive psychology, and computational linguistics, this book also serves as a reference for graduate courses on automated essay evaluation taught in education, computer science, language, linguistics, and cognitive psychology.

**Adventures of Huckleberry Finn** Aug 01 2022 Following Common Core Standards, this lesson plan for Mark Twain's, "Adventures of Huckleberry Finn" is the perfect solution for teachers trying to get ideas for getting students excited about a book. BookCaps lesson plans cover five days worth of material. It includes a suggested reading schedule, discussion questions, essay topics, homework

assignments, and suggested web resources. A separate book is also available that contains a companion study guide to the book. *Automated Essay Scoring* Jan 14 2021 This book discusses the state of the art of automated essay scoring, its challenges and its potential. One of the earliest applications of artificial intelligence to language data (along with machine translation and speech recognition), automated essay scoring has evolved to become both a revenue-generating industry and a vast field of research, with many subfields and connections to other NLP tasks. In this book, we review the developments in this field against the backdrop of Elias Page's seminal 1966 paper titled "The Imminence of Grading Essays by Computer." Part 1 establishes what automated essay scoring is about, why it exists, where the technology stands, and what are some of the main issues. In Part 2, the book presents guided exercises to illustrate how one would go about building and evaluating a simple automated scoring system, while Part 3 offers readers a survey of the literature on different types of scoring models, the aspects of essay quality studied in prior research, and the implementation and evaluation of a scoring engine. Part 4 offers a broader view of the field inclusive of some neighboring areas, and Part 5 closes with summary and discussion. This book grew out of a week-long course on automated evaluation of language production at the North American Summer School for Logic, Language, and Information (NASSLLI), attended by advanced undergraduates and early-stage graduate students from a variety of disciplines. Teachers of natural language processing, in particular, will find that the book offers a useful foundation for a supplemental module on automated scoring. Professionals and students in linguistics, applied linguistics, educational technology, and other related disciplines will also find the material here useful.

**Classroom Assessment in Action** Jun 26 2019 Public law has been conceived in many different ways, sometimes overlapping, often conflicting. However in recent years a common theme running through the discussions of public law is one of loss. What function and future can public law have in this rapidly transforming landscape, where globalized states and supranational institutions have ever-increasing importance? The contributions to this volume take stock of the idea, concepts, and values of public law as it has developed alongside the growth of the modern state, and assess its continued usefulness as a distinct area of legal inquiry and normativity in light of various historical trends and contemporary pressures affecting the global configuration of law in general. Divided into three parts, the first provides a conceptual, philosophical, and historical understanding of the nature of public law, the nature of private law and the relationship between the public, the private, and the concept of law. The second part focuses on the domains, values, and functions of public law in contemporary (state) legal practice, as seen, in part, through its relationship with private domains, values, and functions. The final part engages with the new legal scholarship on global transformation, analysing the changes in public law at the national level, including the new forms of interpenetration of public and private in the market state, as well as exploring the ubiquitous use of public law values and concepts beyond the state.

Innovative Assessment for the 21st Century Sep 29 2019 In today's rapidly changing and information-rich world, students are not acquiring adequate knowledge and skills to prepare them for careers in mathematics, science, and technology with the traditional approach to assessment and instruction. New competencies (e.g., information communication and technology skills) are needed to deal

successfully with the deluge of data. In order to accomplish this, new "educationally valuable" skills must be acknowledged and assessed. Toward this end, the skills we value and support for a society producing knowledge workers, not simply service workers, must be identified, together with methods for their measurement. Innovative Assessment for the 21st Century explores the faces of future assessment—and ask hard questions, such as: What would an assessment that captures all of the above attributes look like? Should it be standardized? What is the role of the professional teacher?
