A Comprehensive Guide to Child Psychotherapy and Counseling Apr 29 2020 Christiane Brems, in collaboration with new coauthor Christina Rasmussen, introduces prospective and practicing clinicians to theories and principles of applied clinical work with children ages three to twelve years. The authors take an integrated approach to understanding children and their families, using a biopsychosociocultural model for conceptualization and treatment planning. Their methods are practical and compassionate, as well as contextually grounded and individually tailored. Chapters follow the logical development of clinicians, mirroring the natural flow of work with children. Coverage ranges from the importance of a beginning

practitioner's introspection and of ethical and legal issues to a variety of intervention techniques and strategies and, finally, termination. Case studies showcase individualized and mindful treatment for each child with whom a clinician works. Outstanding Features of the Fourth Edition . . . - Essential attention to how clinicians' self-awareness can lead to positive therapeutic relationships with children and their families. - Thorough discussions of the biopsychosociocultural model for conceptualization and treatment planning. - Emphasis on intensive assessment prior to treatment planning to address the needs of each child and family. - A compelling, practical exploration of mindfulness intervention with children. The authors' methodology addresses the profound effects of the larger environment and culture on children. By adopting the authors' integrated approach, clinicians are better able to understand important and complicated aspects of a child's and family's life. From there, compassionate, thoughtful, and relevant intervention ensues.

Slipping Through the Cracks Oct 28 2022 Clients who have multiple addictions and disorders are more difficult to engage and treat than clients with a single disorder. Many of the current systems are ill-equipped to address the myriad challenges of these clients—their relapse and recidivism rates are higher, and many of these clients tend to slip through the cracks, often going back and forth among addictions treatment, psychiatric and medical hospitalizations, and incarceration. Too many difficult-to-reach clients are at risk for relapse because their practitioners lack effective, innovative strategies for this unique client base who remain part of a revolving-door syndrome. Now, Certified Alcohol and Drug Addictions Counselor Mark Sanders, LCSW, offers specific strategies to assist therapists and counselors who work with difficult and at-risk populations, including those with: multiple addictions co-occurring disorders adolescents; rural methamphetamine users antisocial personality disorder, criminality, and addiction trauma or grief and chemical dependency history of chronic relapse and recidivism

Slipping Through the Cracks is a encyclopedic handbook to specific traits of the difficult-to-reach client, as well as a concise guidebook to effective strategies that will be useful to anyone working with clients in private practice or in treatment programs who have both mental health and substance abuse issues.

Altering American Consciousness Apr 10 2021 Virtually every American alive has at some point consumed at least one, and very likely more, consciousness altering drug. Yet, if the use of drugs is a constant in American history, the way they have been perceived has varied extensively. Just as the corrupting cigarettes of the early twentieth century ("coffin nails" to contemporaries) became the glamorous accessory of Hollywood stars and American GIs in the 1940s, only to fall into public disfavor later as an unhealthy and irresponsible habit, the social significance of every drug changes over time. The essays in this volume explore these changes, showing how the identity of any psychoactive substance -- from alcohol and nicotine to cocaine and heroin -- owes as much to its users, their patterns of use, and the cultural context in which the drug is taken, as it owes to the drug's documented physiological effects. Rather than seeing licit drugs and illicit drugs, recreational drugs and medicinal drugs, "hard" drugs and "soft" drugs as mutually exclusive categories, the book challenges readers to consider the ways in which drugs have shifted historically from one category to another. -- From publisher's description.

Illicit Drugs Jan 19 2022 This concise, up-to-date volume compiles information and materials documenting illicit drugs and their use from multiple perspectives. • A chronology of significant events, decisions, policies, and agreements about illicit drug use in the United States from 1872 to the present • Graphs and tables about illicit drug use patterns and problems • A world map depicting the distribution of problem drugs throughout the world •

A glossary of key terms about drug use and abuse • A bibliography of significant reference materials addressing illicit drug use

Hidden Addictions Oct 04 2020 Many people seek treatment for life problems without knowing that the real problem is an addiction. If the patient does not report an addiction as part of the presenting problem, it is likely to remain unrecognized. This is the first book to address how to recognize and assess for undisclosed addictions in the context of health and mental health care settings. Visit our website for sample chapters!

On the Other Side of Chaos Jul 25 2022 Based in part on her own family's journey, Ellen Van Vechten explains the science of addiction, the theory of treatment, and the twelve-step model of recovery, providing sensible information and tips for reasoned action in support of a loved one while fostering personal growth and recovery. Powerlessness over another's addiction has a caustic effect on the family. Too often parents and partners equate "letting go" with "giving up." While acceptance of a lack of control is essential to coping with the disease within the family system, there is nothing passive about supporting a partner or child in their journey to recovery. This concept is the foundation of Van Vechten's original approach to empower individuals with knowledge, which when coupled with acceptance allows any family dealing with active addiction to make thoughtful and reasoned decisions to facilitate the recovery of both their loved ones and themselves.

Saving Beck May 11 2021 From New York Times bestselling author Courtney Cole comes "a raw, powerful, heart-wrenching read" (Robyn Harding, international bestselling author of *The Party*) about a son's heroin addiction and its harrowing effects on both him and his mother, reminiscent of the #1 New York Times bestselling memoir *Beautiful Boy*. There comes a time when offering your life for your child's doesn't work, when you realize that it'll never be enough. The cold needle in his warm vein was a welcome comfort to my son at first. But then it became the

monster that kept us apart. Heroin lied, and my son believed. It took him to a world where the last year didn't happen, to a place where his father was still alive. What Beck didn't understand was that it couldn't bring his father back from the dead. It couldn't take away his pain, not permanently. You think it can't happen to you, that your kids, your family, will never be in this situation. I thought that too. But you're wrong. Step into our world, and see for yourself. Watch my golden boy become a slave to this raging epidemic. Watch me try and save him. Drug addiction comes with a price. Trust me, you're not equipped to pay it. Don't miss this heartwrenching, evocative, yet hopeful novel—"it will rip your heart out but then leave you knowing there is a light at the end of the tunnel" (Nikki Sixx, New York Times bestselling author of *The Heroin Diaries*).

Uppers, Downers, and All Arounders Nov 29 2022 The content relies on the most current data and studies as well as practical information and interviews drawn from treatment professionals and their clients. The material gives perceptive insights into the complex fields of drug abuse, compulsive behaviors, addiction, treatment, recovery, and prevention.

The Disease of Addiction Feb 20 2022 Joseph Caravella, MA LADC currently practices as an addiction therapist for the Hazelden Betty Ford Foundation at their campus in Center City, Minnesota. As an educator he's known for his high energy, breathtaking lectures (on addiction, forgiveness, and love). In "The Disease of Addiction," he masterfully unravels the complexities of the addicted brain, breaks down the fundamental components of addiction in easy-to-understand terms, and paints a detailed clinical picture with color sourced from his own harrowing experiences with addiction, mental illness, and early recovery. Foreword by the author: I've been formally studying addiction since 2011 while also walking my own path in recovery that began in 2008. Even after years of self-study, thousands of twelve-step meetings, graduate school, and professional experience treating the illness, my experience shows that this

disease is not the easiest subject to grasp. But knowledge truly is power. And after studying the best textbooks and reports on the neurobiology of addiction, I believe the information in them is sound and of the utmost importance. That said, I also think the packaging and delivery of the material should be more accessible to addicted people, their family and friends, and anyone curious to learn more about the disease. I've been privileged to lecture on the disease of addiction to large treatment populations for years. Inspired by requests for written material beyond my lectures and by my personal mission to improve addiction education, this short book is a meditation on the evolutionary perspective of chemical use, the origins of the Alcoholics Anonymous program, our present understanding of the neurobiology of addiction, and how the twelve-step solution is well supported by scientific evidence. I also describe the correlation between physiological stress response in early recovery and a spirituality-based approach to recovery in a manner that I haven't seen in the literature. In this book, I'm specifically speaking to the person unsure about addiction as a disease but also pained by the consequences of their chemical use. To me, this person is the newcomer to recovery, and they are the most important person about whom I should be concerned when discussing addiction and recovery. Special thanks to my clients, family, teachers, guides, mentors, colleagues, bosses, and especially my wife for making this possible. I was taught that I can only keep what peace and love I have by freely giving it away. In part, this is my love to you.

When the Servant Becomes the Master Apr 22 2022 The definitive guide to addiction that addresses misinformation and stigma, humanizes the disease within a framework of science, research, and personal experience, and provides a wealth of information on the various forms addiction takes as well as rich data regarding treatments.

Sex, Teens, and Everything in Between Oct 24 2019 The only book you need to start a conversation with your kids about sexual harassment, consent, #metoo, and more Many American teens are steeped in a culture that sends unsettling messages about sex, through everything from politics to music to the normalization of porn. In today's environment, it's crucial that teens be able to ask hard questions about how to take care of themselves, make decisions that reflect their values, and stay safe. In *Sex, Teens, and Everything in Between*, veteran teen sex educator and mother of three Shafia Zaloom helps you discuss a wide variety of sex-related topics with your teens, including: How to get and give consent What it means to have "good" sex How to help prevent sexual harassment and assault How to stay safe in difficult situations The legal consequences of sexual harassment and assault, and what to do if a teen experiences assault or is accused of it Stories from survivors of sexual assault Approachable, engaging, and with real-life scenarios and discussion questions in every chapter, *Sex, Teens, and Everything in Between* is a must-have resource that gives parents and educators the tools they need to have meaningful

conversations with teens about what sex can and should be. *Addiction Treatment* Jun 12 2021 ADDICTION TREATMENT covers the biological, psychological, and social aspects of alcoholism, eating disorders, compulsive gambling, and other addictions. The authors bridge the gap between the popular twelve-step and harm-reduction approaches, thus illuminating how practitioners can guide clients down a trusted path that is tailored towards the client's particular needs. Through a number of first-person narratives about the experience of addiction, students will discover a realism and depth not commonly found in textbooks. In addition, the authors include student-friendly topics, such as the case against so-called underage drinking laws, to draw students into the material and illustrate the importance of reducing harm within the biopsychological framework that ties the text together. Updated to reflect the DSM-5, this edition also includes the latest insights into social determinants of health, trauma-informed care, working with transgender populations, and other timely topics. Everyday Ethics Mar 21 2022 This book explores the moral lives of mental health clinicians serving the most marginalized individuals in the US healthcare system. Drawing on years of fieldwork in a community psychiatry outreach team, Brodwin traces the ethical dilemmas and everyday struggles of front line providers. On the street, in staff room debates, or in private confessions, these psychiatrists and social workers confront ongoing challenges to their self-image as competent and compassionate advocates. At times they openly question the coercion and forced-dependency built into the current system of care. At other times they justify their use of extreme power in the

face of loud opposition from clients. This in-depth study exposes the fault lines in today's community psychiatry. It shows how people working deep inside the system struggle to maintain their ideals and manage a chronic sense of futility. Their commentaries about the obligatory and the forbidden also suggest ways to bridge formal bioethics and the realities of mental health practice. The experiences of these clinicians pose a single overarching question: how should we bear responsibility for the most vulnerable among us?

Foundations for Community Health Workers Jul 13 2021

Foundations for Community Health Workers Foundations for Community Health Workers is a training resource for client- and community-centered public health practitioners, with an emphasis on promoting health equality. Based on City College of San Francisco's CHW Certificate Program, it begins with an overview of the historic and political context informing the practice of community health workers. The second section of the book addresses core competencies for working with individual clients, such as behavior change counseling and case management, and practitioner development topics such as ethics, stress management, and conflict resolution. The book's final section covers skills for practice at the group and community levels, such as conducting health outreach and facilitating community organizing and advocacy. Praise for Foundations for Community Health Workers "This book is the first of its kind: a manual of core competencies and curricula for training community health workers. Covering topics from health inequalities to patient-centered counseling, this book is a tremendous resource for both scholars of and practitioners in the field of community-based medicine. It also marks a great step forward in any setting, rich or poor, in which it is imperative to reduce health disparities and promote genuine health and well-being." Paul E. Farmer, MD., PhD, Maude and Lillian Presley Professor of Social Medicine in the Department of Global Health and Social Medicine at Harvard Medical School; founding director, Partners In Health. "This book is based on the contributions of experienced CHWs and advocates of the field. I am confident that it will serve as an inspiration for many CHW training programs." Yvonne Lacey, CHW, former coordinator, Black Infant Health Program, City of Berkeley Health Department; former chair, CHW Special Interest Group for the APHA. "This book masterfully integrates the

knowledge, skills, and abilities required of a CHW through storytelling and real life case examples. This simple and elegant approach brings to life the intricacies of the work and espouses the spirit of the role that is so critical to eliminating disparities a true model educational approach to emulate." Gayle Tang, MSN, RN., director, National Linguistic and Cultural Programs, National Diversity, Kaiser Permanente "Finally, we have a competency-based textbook for community health worker education well informed by seasoned CHWs themselves as well as expert contributors." Donald E. Proulx, CHW National Education Collaborative, University of Arizona

Broken Bottles, Broken Dreams Jun 24 2022 At least fifteen million American children of school age have severe problems that are caused or exacerbated by a parent's alcoholism. This book draws on the experience of a nationally respected model program to show how these children can be helped. Part 1 focuses on an understanding of what alcoholism is and is not, and its impact on family members. Part 2 presents scenarios of persons helping in their various roles, examines important support agencies, and explains how and why their methods work. "I recommend the book to anyone with an interest in the treatment and prevention of alcoholism." —American Journal of Nursing "This book is an invaluable resource for those working with children in a professional capacity." —Social Work in Health Care
