No one can deny the fact that intellectual property and its creation, protection, and management, has become a major area of concern for individuals and companies worldwide. Unprotected intellectual property has the shelf life of a banana, or perhaps even less. Intellectual property is inherently in the public domain, unless the government provides legal protection. Protected intellectual property is a valuable exclusive right. This book explores the exclusive rights associated with intellectual property by highlighting issues in copyright law and orphan works, music piracy and the Recording Industry Association of America, patent law and the development of the Segway, patent licensing and litigation between Xerox Corporation and Palm Incorporated, as well as metadata and the role of intellectual property lawyers.

Law and Migration in a Changing World Apr 04 2020 This volume comprises national reports on migration and migration law from 17 countries representing all continents. The vast majority of these are countries of immigration, which means they face specific challenges in terms of managing migratory flows that are increasingly linked with climate change and scarce natural resources worldwide, and they need to find viable ways to integrate humanitarian migration. Unlike so many recent publications in the field of international migration law, this book brings together reports on diverse countries that are rarely regarded as part of one and the same picture, depicting globalized migration in the contemporary era that to a large extent challenges state sovereignty. The contributions delineate the legal regimes that individual states are continually developing and modifying with a view to managing and controlling access of individual persons to their respective territories. They also show how the restrictive measures that states resort to in the event of failure to manage migration could have a lasting legal impact. The General Report preceding the country reports provides a comparative overview of the national reports, and is divided into two parts. The first, more technical in nature, addresses the classic questions relating to admission to and residence in a country. The second, more reflective section, examines the relationship between laws and migration in a wider and multidisciplinary perspective. To allow a robust comparison, the country reports all follow a similarly wide-ranging structure; to the extent possible, they also cover the historical, sociological and demographic factors that help

explain legal regimes and migratory flows in each country. Each country report includes analyses of recent legislative developments and delicate questions that are still awaiting adequate (legal) responses as well as perspectives for the future. *The PowerPC Architecture* Jan 26 2022 An essential book for 3rd party developers and others interested in products using the PowerPC including those from IBM, Apple, and many other vendors.
